SINGAPORE INPUT-OUTPUT TABLES 2007

Singapore Department of Statistics

March 2012

Papers in this Information Paper Series are intended to inform and clarify conceptual and methodological changes and improvements in official statistics. The views expressed are based on the latest methodological developments in the international statistical community. Statistical estimates presented in the papers are based on new or revised official statistics compiled from the best available data. Comments and suggestions are welcome.

SINGAPORE INPUT-OUTPUT TABLES 2007

Introduction

Input-Output (I-O) tables provide systematic and detailed information on production activities of an economy by recording transactions between producers and consumers in an economic system. They are primarily related to the production account in the System of National Accounts (SNA) and are made up of three basic tables and a set of symmetric tables.

To date, the Singapore Department of Statistics (DOS) has published eight sets of benchmark I-O tables for the reference years 1973, 1978, 1983, 1988, 1990, 1995, 2000 and 2005. The 2007 I-O tables are an intermediate set of tables as DOS works towards compiling more frequent I-O tables to provide more timely statistical information for analysis and policy formulation. The 2007 I-O tables are an update of the 2005 benchmark tables based on 2007 data while the methodologies and framework used to compile these tables are similar to those of the 2005 tables¹.

Sources and Methodology

Sources of Data

The data used for compiling 2007 I-O tables are obtained primarily from surveys and censuses conducted by DOS and other government agencies. This is supplemented by administrative data collected by various government bodies in the course of their operations, for example, government revenue and expenditure data (Table 1).

TABLE 1 MAIN DATA SOURCES

SURVEYS & CENSUSES	OTHERS
Census of Manufacturing Activities	Merchandise Trade Statistics
Survey of Utilities, Sewerage & Waste Management	Government Revenue & Expenditure Data
Annual Survey of Services	Audited Company Reports
Survey of Services on Financial Institutions/ Insurance Companies	
International Trade in Services	
Census of Population, General Household Survey & Household Expenditure Survey	

¹ A detailed discussion of the methodology, structure and applications of I-O tables can be found in [Singapore Input-Output Tables 2005](#).

Methodology

The Singapore I-O tables follow closely the concepts and principles recommended in the SNA. Some of these concepts are elaborated here.

i) Statistical Unit

For the compilation of the Singapore I-O tables, the establishment is chosen as the statistical unit for input data and the commodity as the unit of output data. The establishment, as defined by the SNA, “*is an enterprise, or part of an enterprise, that is situated in a single location and in which only a single productive activity is carried out or in which the principal productive activity accounts for most of the value-added.*” When establishments engaging in the same or similar kinds of activity are grouped together, an industry is formed. Commodities are goods and services that result from production of goods or provision of services.

ii) Valuation

In the Singapore I-O tables, the valuation of all inputs and output is at basic price which is defined as the amount receivable by the producer from the purchaser for a unit of good or service minus any tax payable and plus any subsidy receivable on the product.

This valuation is adopted for the compilation of the Singapore I-O tables as it is the most consistent valuation basis for all transactions. Trade and transport margins deducted are allocated to their own industry/commodity groups, and taxes on products are shown separately.

iii) Treatment of Imports and Exports

Goods that are imported and then subsequently re-exported without being processed are omitted in the compilation of the Singapore I-O tables. Transhipment of goods are also excluded. Exports of goods are valued free on board (f.o.b.) i.e. at the prices at the domestic customs frontier before being shipped out. For imports which are valued at cost, insurance, freight (c.i.f.) at the domestic customs frontier, the basic value of the goods is shown separately from the associated freight and insurance payments in the import matrix.

Reconciliation

The process of compiling I-O tables mainly involves reconciling the voluminous data from various sources, and fitting them together to form a complete picture of the economy.

Discrepancies in data from different sources may arise due to a variety of reasons, for example, differences in definitions, classifications, valuation, estimation methods as well as sampling errors. These are addressed by a reconciliation process involving detailed examination of the myriad data.

Basic Structure of Input-Output Tables

The Singapore I-O tables comprise three basic matrices, namely the make matrix, absorption matrix and import matrix. These three tables bring together the production, expenditure and income measures of GDP and form the basis from which the symmetric tables and all other applications of I-O tables are derived.

The 2007 I-O tables are compiled based on the same 136 industries and 136 commodities as that of the 2005 benchmark I-O tables. The classification of industries in the 2007 I-O tables follows that of the 2005 I-O tables and is based on the 2005 Singapore Standard Industrial Classification (SSIC 2005).

However, the classification of commodities has been updated and is based on the Standard International Trade Classification, Rev. 4 (SITC Rev.4) and the Harmonised Commodity Description and Coding System Nomenclature 2007 (HS 2007), as compared to the earlier versions of the SITC Rev.3 and HS 2002 used in the 2005 I-O tables. The commodity codes in the new classification are mapped to the same 136 commodity codes used in the 2005 tables².

For the purpose of this article, the I-O tables are presented using 12 industries and commodities³.

Make Matrix

The make matrix records all domestic production, broken down by industries and commodities. Each cell shows the output of the commodity along the column produced by the industry along the row. The sum of each row gives the total output of an industry which can be broken down into its primary and secondary production. The sum of each column shows the total output of a particular commodity by both its primary and secondary producers. In 2007, the Singapore economy produced \$694.6 billion worth of goods and services, shown in the lower-right corner of Table 2.

It can be observed that the entries on the diagonals of the make matrix are always larger than the off-diagonals. These are the primary commodities of the respective industries as the primary commodity output of a producing unit is related to its primary production activity which in turn determines its industry classification. For example, the non-oil manufacturing industry is the primary producer of the non-oil manufacturing commodity, producing \$202.0 billion worth of non-oil manufacturing goods. It is also the secondary producer of other commodities such as utilities, construction and business services.

An industry's share of the production of a commodity can also be determined from the make matrix by taking its output value in the column as a percentage of the column total. For example, the production of the business services commodity was \$73.5 billion, of which the business services industry produced \$62.5 billion or about 85 per cent of the total commodity output.

² The correspondence between the I-O industry/commodity codes, SSIC and SITC is given in Appendix 1.

³ The correspondence between the 12 industries and commodities, and the detailed 136 I-O industries and commodities is given in Appendix 2.

Note: Figures may not add up due to rounding

Absorption Matrix

The second basic table, which is referred to as the absorption matrix, records the commodities purchased or used by industries as intermediate inputs to current production. A convention in I-O tables is to present other relevant information together with the absorption matrix. Table 3 shows a schematic form of the absorption matrix and the related matrices, broken down into its four constituent quadrants.

Quadrant 1 shows commodities purchased domestically by industries as intermediate inputs to current production while Quadrant 2 records the commodities consumed by final demand. Final demand consists of private consumption expenditure (PCE), government consumption expenditure (GCE), gross fixed capital formation (GFCF), changes in inventories, and exports of goods and services. Quadrant 3 shows the rest of the inputs required by industries, namely imports, taxes on products and value-added while Quadrant 4 shows imports and taxes on products which flow directly to final demand. Collectively, Quadrants 1 and 2 show the total usage of each commodity while Quadrants 1 and 3 show the inputs used to produce the total output of each industry.

The four quadrants presented together allows for the computation of GDP by each of the three approaches, namely the production approach, expenditure approach and income approach, using the equations shown in Table 4.

TABLE 4 DERIVATION OF GDP AT CURRENT MARKET PRICES

Production Approach	
GDP =	Output – Intermediate inputs + Taxes on products by final demand
Expenditure Approach	
GDP =	Total final demand – Total imports
Income Approach	
GDP =	Sum of factor income + Total taxes on products

Table 5 shows the absorption matrix for the Singapore economy in 2007. The total intermediate output used by domestic industries amounted to \$220.6 billion while total purchases by final consumers were \$474.0 billion.

The usage of commodities by industries and final consumers can be seen from the table. For example, total non-oil manufacturing commodity output was \$202.5 billion, of which \$45.7 billion worth of intermediate output was distributed to industries and \$156.8 billion was purchased by consumers as final demand. The bulk of the intermediate output was supplied to the non-oil manufacturing industry which amounted to \$35.7 billion, and the remaining was provided to other industries such as construction and business services. The final demand of non-oil manufacturing commodity was mainly for exports worth \$152.0 billion, which is a reflection of Singapore's export-oriented economy.

TABLE 3 SCHEMATIC REPRESENTATION OF ABSORPTION AND RELATED MATRICES

Sales by Commodity	Purchases by Industry						Total intermediate output	Final Demand					Total output
	Industry 1	Industry 2	Industry n		Private consumption expenditure	Government consumption expenditure	Gross fixed capital formation	Changes in inventories	Exports of goods & services	
Commodity 1													
Commodity 2													
....													
....													
....													
Commodity n													
Total intermediate inputs													
Imports of goods and services													
Taxes on products													
Value-added at basic prices													
Other taxes on production													
Compensation of employees													
Gross operating surplus													
Total inputs													

[Light Yellow Box] Corresponds to aggregates shown as components of gross domestic product, production approach

[Light Orange Box] Corresponds to aggregates shown as components of gross domestic product, expenditure approach

[Dark Red Box] Corresponds to aggregates shown as components of gross domestic product, income approach

The use of intermediate inputs and value-added inputs by industries to produce their output can also be observed from Table 5. For example, the non-oil manufacturing industry required \$62.3 billion of domestic inputs and \$90.3 billion of imported inputs. It also required \$58.4 billion of value-added inputs, of which \$0.6 billion was other taxes on production, \$18.1 billion was compensation of employees and the remaining \$39.7 billion was gross operating surplus.

Import Matrix

Similar to the absorption matrix, an import matrix records the imports of goods and services by commodity entering industries as intermediate inputs, and final demand as consumption or capital formation. It is an expansion of the row vector of imports of goods and services in Table 5 to show the commodities making up the imports.

Total imports of goods and services in 2007 were \$267.1 billion, of which \$221.3 billion was purchased by industrial sectors as inputs for their production, with only \$45.8 billion used for final demand (Table 6). The bulk of the imports were manufacturing commodities which made up 68 per cent of total imports.

Use of Input-Output Tables

Besides providing detailed economic statistics on inter-industry flows, I-O tables can also be used for analysis and policy formulation.

In order to use these tables for analytical purposes, the absorption matrix (Table 5) has to be expressed in a symmetrical form, showing either the purchases of industrial output by industries and final demand, or the purchases of commodities by commodity production process. These symmetric tables are known as *industry-by-industry* tables or *commodity-by-commodity* tables.

Multipliers, an important tool for economic analysis, can be computed from the I-O tables. They measure the impact on the total economy as a result of an initial exogenous change in final demand. Different multipliers can be generated depending on the purpose of analysis. Some of the more commonly used multipliers are output, value-added and import multipliers.

While multiplier analysis is useful for measuring the impact on the entire economy, researchers may sometimes want to assess the impact of an exogenous change on specific sectors. Dependency analysis, another application of I-O tables, can be used to show how the multiplier effect is distributed across different sectors of the economy.

Conclusion

The 2007 I-O tables seek to provide more timely statistical information for analysis and policy formulation. The complete set of tables at the detailed industry and commodity levels can be downloaded from the DOS website at www.singstat.gov.sg.

SINGAPORE DEPARTMENT OF STATISTICS

28 MARCH 2012

APPENDICES

Appendix 1

Classification of Industry/Commodity

Industry/Commodity Classification	Singapore Standard Industrial Classification, 2005 (SSIC 2005)	Standard International Trade Classification, Rev.4 (SITC Rev.4)
001 Nursery products	01141, 01142, 01149 (Part)	292 (Part)
002 Other agriculture	0111x, 01120, 01130, 01149(Part), 01190, 01300(Part), 0140x, 02000	041, 042(Part), 043, 044, 045, 054(Part), 057(Part), 072(Part), 121(Part), 222, 223(Part), 263(Part), 264(Part), 265(Part), 292(Part)
003 Livestock	0121x, 0122x, 0123x, 01300(Part)	001, 012(Part), 025, 061(Part), 098(Part), 211(Part), 212(Part), 261(Part), 268(Part), 291(Part), 431(Part)
004 Aquarium fish	03203	034 (Part)
005 Other fisheries	0310x, 03201, 03202, 03204, 03205, 03209, 0330x	034(Part), 036(Part), 291(Part), 292(Part)
006 Food preparations	1511x, 1512x, 1513x	011, 012(Part), 016, 017, 034(Part), 035, 036(Part), 037, 054(Part), 056(Part), 057(Part), 058, 059, 062(Part), 098(Part), 411(Part)
007 Bread, biscuits and Confectionery	1541x	048(Part)
008 Sugar, Chocolate & related products	15322, 1542x, 1543x	061(Part), 062(Part), 072(Part), 073
009 Oils & fats	1514x	081(part), 091, 411(Part), 421, 422, 431(Part)
010 Dairy products	1520x	022(Part), 023, 024, 098(Part) 111(Part), 592(Part)
011 Coffee & tea	15451, 15452, 15453, 15454	071, 074, 098(Part)
012 Other food products	1531x, 15321, 15329, 15330, 15440, 15455, 1549x	022(Part), 042(Part) 046, 047, 048(Part), 056(Part), 072(Part), 075, 081(Part), 098(Part), 223(Part), 278(Part), 291(Part), 292(Part), 592(Part)

Industry/Commodity Classification	Singapore Standard Industrial Classification, 2005 (SSIC 2005)	Standard International Trade Classification, Rev.4 (SITC Rev.4)
013 Soft drinks	1604x	111(Part)
014 Alcoholic drinks and tobacco products	16010, 16020, 16030, 1700x	098(Part), 112, 121(Part), 122, 512(Part)
015 Yarn, fabrics & textile articles	1810x, 1821x, 18220, 18230, 18290, 19301	261(Part), 263(Part), 264(Part), 265(Part), 266(Part), 267(Part), 268(Part), 269(Part), 651(Part), 652, 653, 654, 655, 656, 657(Part), 658, 659(Part), 821(Part)
016 Wearing apparel	1910x, 19302, 19303, 19309	657(Part), 841, 842, 843, 844, 845, 846, 848(Part)
017 Footwear, leather & fur products	1920x, 20110, 2012x, 2020x	211(Part), 212(Part), 611, 612, 613, 831, 848(Part), 851, 885(Part)
018 Wood and wooden products (except furniture)	2110x, 2121x, 2122x, 2123x, 2129x, 36105, 36996(Part), 36997(Part)	244, 245(Part), 246, 247, 248, 292(Part), 633, 634, 635, 811(Part), 899(Part)
019 Paper and paper products	22010, 2202x, 2209x, 36997(Part)	251(Part), 598(Part), 641, 642(Part), 657(Part), 663(Part)
020 Newspapers, books and magazines	23111, 23112	892(Part)
021 Other printing	23113, 23114, 23115, 23119, 2312x	642(Part), 892(Part),
022 Petroleum and petroleum products	10001, 24100, 2420x	278(Part), 325, 333, 334(Part), 335(Part), 342, 344(Part)
023 Industrial chemicals and gases	2521x, 25269	274(Part), 281(Part), 285(Part), 335(Part), 431(Part), 511(Part), 512(Part), 513(Part), 514(Part), 515(Part), 516(Part), 522, 523, 524, 525, 554(Part)
024 Petrochemicals	2510x	335(Part), 511(Part),

Industry/Commodity Classification	Singapore Standard Industrial Classification, 2005 (SSIC 2005)	Standard International Trade Classification, Rev.4 (SITC Rev.4)
		512(Part), 513(Part), 514(Part), 515(Part), 516(Part), 571, 572, 573, 574(Part), 575(Part)
025 Pharmaceutical products	2600x	511(Part), 512(Part), 513(Part), 514(Part), 515(Part), 516(Part), 541(Part), 542, 598(Part)
026 Perfumes, cosmetics & toiletries	25242, 25243	551(Part), 553(Part)
027 Cleaning and polishing preparations	25241, 25244	554(Part), 591(Part), 598(Part)
028 Paints	2523x	532(Part), 533(Part), 598(Part)
029 Food chemicals and additives	25261	514(Part), 516(Part), 532(Part), 533(Part), 551(Part), 598(Part)
030 Other chemical products	2522x, 25250, 25262, 25263, 2529x, 36992	081(Part), 245(Part), 266(Part), 267(Part), 272(Part), 273(Part). 335(Part), 531, 532(Part), 533(Part), 553(Part), 562, 574(Part), 575(Part), 591(Part), 592(Part), 593, 597, 598(Part), 651(Part), 663(Part), 667(Part), 882(Part), 895(Part), 899(Part)
031 Rubber and rubber products	2711x, 2712x, 2719x	231, 232, 292(Part), 621, 625, 629, 657(Part), 848(Part)
032 Plastic precision products	27216	893(Part)
033 Other plastic products	27211, 27212, 27213, 27214, 27215, 27217, 27218, 27219, 27220, 36996(Part), 36997(Part)	581, 582, 583, 773(Part), 848(Part), 893(Part)
034 Glass and glass products	28100	664(Part), 665, 773(Part)
035 Fibreglass and fibreglass products	28992	651(Part), 664(Part)
036 Bricks, cement & concrete products	10002, 1110x, 11900, 2892x, 28930, 2894x, 28950	273(Part), 278(Part), 598(Part), 661(Part),

Industry/Commodity Classification	Singapore Standard Industrial Classification, 2005 (SSIC 2005)	Standard International Trade Classification, Rev.4 (SITC Rev.4)
		662, 663(Part)
037 Non-metallic mineral products	2891x, 28991, 28993, 28994, 28995, 28999	272(Part), 277(Part), 278(Part), 321, 322, 335(Part), 661(Part), 663(Part), 666, 667(Part), 773(Part), 812(Part)
038 Basic metals	2910x, 2920x, 2930x	274(Part), 281(Part), 283, 284, 285(Part), 286, 287, 289(Part), 671, 672, 673, 674, 675, 676, 677, 679(Part), 681, 682(Part), 683(Part), 684(Part), 685, 686, 687, 689(Part), 699(Part), 971(Part)
039 Structural metal products	3011x, 30131, 30994	679(Part), 682(Part), 683(Part), 684(Part), 691, 699(Part), 811(Part)
040 Metal stampings	30911, 30912, 30913, 30914, 30915	
041 Metal precision components	30993, 30995, 30997	694(Part), 699(Part),
042 Non-insulated cable products	3094x	678, 682(Part), 683(Part), 684(Part), 693(Part), 699(Part)
043 Metal containers	30120, 3095x	692, 699(Part)
044 Treatment and coating of metals	3092x	
045 Other metal products	30139, 30919, 3093x, 30991, 30992, 30996, 30998, 30999, 31122, 31129(Part), 31131, 31260, 36912, 36996(Part), 36997(Part)	682(Part), 683(Part), 684(Part), 689(Part), 693(Part), 694(Part), 695, 696, 697(Part), 699(Part), 711, 718(Part), 743(Part), 746, 747(Part), 748(Part), 749(Part), 778(Part), 812(Part), 848(Part), 891(Part), 895(Part)
046 Computers and computer peripheral equipment	33411, 33415, 33416, 33419	726(Part), 751(Part), 752(Part), 759(Part)

Industry/Commodity Classification	Singapore Standard Industrial Classification, 2005 (SSIC 2005)	Standard International Trade Classification, Rev.4 (SITC Rev.4)
047 Data storage	33412, 33413, 33414, 33417	752(Part), 898(Part)
048 Audio and video equipment	3330x	761(Part), 762, 763, 764(Part)
049 Semiconductors	3311x	776(Part)
050 Electron tubes and electronic display devices	33191, 33198	776(Part), 778(Part), 871(Part)
051 Printed circuit boards	33194, 33195, 33196	759(Part), 764(Part), 771(Part), 772(Part), 778(Part)
052 Communication equipment	3320x, 33904	751(Part), 752(Part), 761(Part), 764(Part), 778(Part)
053 Other electronic products	33192, 33193, 33197, 33199, 3349x, 33901, 33902, 33903, 33909	751(Part), 759(Part), 771(Part), 772(Part), 776(Part), 778(Part), 898(Part)
054 Lifting and hoisting machinery	3114x	723(Part), 728(Part), 744(Part)
055 Other industrial machinery and equipment	31110, 31121, 31129(Part), 31132, 31192, 31193, 31199, 31210, 3122x, 31233, 3124x, 31250, 3127x, 31291, 31293, 31294, 31295, 31299	699(Part), 712, 713(Part), 714(Part), 718(Part), 721, 722, 723(Part), 724(Part), 725, 726(Part), 727(Part), 728(Part), 731, 733, 735, 737(Part), 741(Part), 742(Part), 743(Part), 744(Part), 745(Part), 747(Part), 748(Part), 749(Part), 759(Part), 775(Part), 778(Part), 784(Part), 786(Part), 812(Part), 874(Part)
056 Refrigerators and air-conditioners	31191	741(Part), 743(Part), 775(Part)
057 Oil rigs and oilfield machinery	31231, 31232, 31239	679(Part), 723(Part), 743(Part), 793(Part)
058 General engineering works	31292	
059 Electrical industrial apparatus	3210x, 3220x, 32305, 32900	716, 727(Part), 737(Part), 745(Part),

Industry/Commodity Classification	Singapore Standard Industrial Classification, 2005 (SSIC 2005)	Standard International Trade Classification, Rev.4 (SITC Rev.4)
		771(Part), 772(Part), 773(Part), 775(Part) 778(Part)
060 Recorded Media	23200, 36991	898(Part)
061 Household appliances	3260x	697(Part), 724(Part), 741(Part), 742(Part), 743(Part), 745(Part), 775(Part)
062 Storage and primary batteries	3240x	778(Part)
063 Electrical wires and cables	32301, 32302, 32303, 32304, 32309	773(Part)
064 Lamp and lighting fixtures	32500, 36997(Part)	778(Part), 813, 894(Part)
065 Land transport equipment	3510x, 35300, 3590x	713(Part), 743(Part), 748(Part), 778(Part), 781, 782, 783, 784(Part), 785, 786(Part), 791, 891(Part)
066 Building of ships and boats	35201, 35203(Part)	793(Part)
067 Repairing of ships and boats	35202, 35203(Part)	
068 Marine engine and ship parts	35204	713(Part), 748(Part)
069 Aircraft	3540x	713(Part), 714(Part), 778(Part), 792, 899(Part)
070 Medical instruments	34111, 34112, 34113, 34114, 34119	541(Part), 741(Part), 743(Part), 774(Part), 872(Part), 893(Part), 899(Part)
071 Scientific instruments (including watches & clocks)	3412x, 34130, 3430x	745(Part), 747(Part), 774(Part), 873, 874(Part), 885(Part)
072 Photographic and optical goods	34115, 3420x	871(Part), 874(Part), 881, 882(Part), 883, 884
073 Furniture (except of stone)	36101, 36102, 36103, 36104, 36106, 36109	821(Part), 872(Part)
074 Jewellery	36911, 36919, 36998	277(Part), 667(Part),

Industry/Commodity Classification	Singapore Standard Industrial Classification, 2005 (SSIC 2005)	Standard International Trade Classification, Rev.4 (SITC Rev.4)
		897, 961, 971(Part)
075 Other Manufacturing	31300, 36920, 36930, 3694x, 36993, 36994, 36995, 36999	291(Part), 659(Part), 751(Part), 759(Part), 811(Part), 821(Part), 874(Part), 894(Part), 895(Part), 896, 898(Part), 899(Part)
076 Scrap	35205, 4300x	081(Part), 121(Part), 251(Part), 261(Part), 263(Part), 267(Part), 268(Part), 269(Part), 278(Part), 282, 288, 289(Part), 291(Part), 334(Part), 541(Part), 579, 599, 689(Part), 778(Part), 793(Part), 931, 971(Part)
077 Electricity	4010x	351
078 Gas	4020x	343, 344(Part), 345
079 Water	41000	
080 Building construction	4521x, 45230, 45242(Part), 45243, 45244(Part), 45249(Part) 45291, 45292, 45301, 45302(Part), 45303, 45304, 45305, 45306, 45307, 45308(Part), 45309, 45401(Part), 45402(Part), 45403(Part), 45404(Part), 45405(Part), 45406(Part), 45409(Part)	
081 Other construction	4510x, 4522x, 45241, 45242(Part), 45244(Part), 45249(Part), 45299, 45302(Part) 45308(Part) , 45401(Part), 45402(Part), 45403(Part), 45404(Part), 45405(Part), 45406(Part), 45409(Part), 45500	
082 Wholesale trade of computer products	50523, 50524, 50525	
083 Wholesale trade of other products	50100, 5021x, 5022x, 5029x, 5031x, 5032x, 5033x, 5034x, 5035x, 5036x, 5037x, 5039x, 5041x, 5042x, 5043x, 5049x, 5051x, 50521, 50522, 5059x, 5061x, 5062x, 5091x, 50920,

Correspondence between the 12 Industrial Sectors and the 136 I-O Codes

Industrial Sector		I-O Codes	
1	Agriculture	001	Nursery products
		002	Other agriculture
		003	Livestock
		004	Aquarium fish
		005	Other fisheries
2	Manufacturing (Non-Oil)	006	Food preparations
		007	Bread, biscuits & confectionery
		008	Sugar, chocolate & related products
		009	Oils & fats
		010	Dairy products
		011	Coffee & tea
		012	Other food products
		013	Soft drinks
		014	Alcoholic drinks & tobacco products
		015	Yarn, fabrics & textile articles
		016	Wearing apparel
		017	Footwear, leather & fur products
		018	Wood & wooden products (except furniture)
		019	Paper & paper products
		020	Newspapers, books & magazines
		021	Other printing
		023	Industrial chemicals & gases
		024	Petrochemicals
		025	Pharmaceutical products
		026	Perfumes, cosmetics & toiletries
		027	Cleaning & polishing preparations
		028	Paints
		029	Food chemicals & additives
		030	Other chemical products
		031	Rubber & rubber products
		032	Plastic precision products
		033	Other plastic products
		034	Glass & glass products
		035	Fibreglass & fibreglass products
		036	Bricks, cement & concrete products
		037	Non-metallic mineral products
		038	Basic metals
		039	Structural metal products
		040	Metal stampings
		041	Metal precision components
		042	Non-insulated cable products
		043	Metal containers
		044	Treatment & coating of metals
		045	Other metal products
		046	Computers & computer peripheral equipment
		047	Data storage

Industrial Sector		I-O Codes
2	Manufacturing (Non-Oil) (cont'd)	048 Audio & video equipment 049 Semiconductors 050 Electron tubes & electronic display devices 051 Printed circuit boards 052 Communication equipment 053 Other electronic products 054 Lifting & hoisting machinery 055 Other industrial machinery & equipment 056 Refrigerators & air-conditioners 057 Oil rigs & oilfield machinery 058 General engineering works 059 Electrical industrial apparatus 060 Recorded media 061 Household appliances 062 Storage & primary batteries 063 Electrical wires & cables 064 Lamp & lighting fixtures 065 Land transport equipment 066 Building of ships & boats 067 Repairing of ships & boats 068 Marine engines & ship parts 069 Aircraft 070 Medical instruments 071 Scientific instruments (including watches & clocks) 072 Photographic & optical goods 073 Furniture (except of stone) 074 Jewellery 075 Other manufacturing
3	Manufacturing (Oil)	022 Petroleum & petroleum products

		136	Ownership of dwellings

SINGAPORE DEPARTMENT OF STATISTICS

INFORMATION DISSEMINATION SERVICES

Statistics Singapore Website

The *Statistics Singapore Website* was launched by the Singapore Department of Statistics (DOS) in January 1995. Internet users can access the website by connecting to:

<http://www.singstat.gov.sg>

Key Singapore statistics are available via the following sections:

- Statistics
 - which provides key data on Singapore's economy and population.
- News
 - which covers the Performance of Singapore Economy, the Consumer Price Index, the Wholesale Trade Index, Business Receipts Index for Service Industries, Retail Sales and Catering Trade Indices, Manufacturing Performance, Singapore External Trade, Tourism Sector Performance, Real Estate Information and Employment Situation.
- Publications – Papers & Analyses
 - which provides papers on economic and social topics.
- Themes
 - which presents official statistics compiled by DOS and the Research and Statistics Units in the various ministries and statutory boards according to themes. Within each theme, relevant statistics and related press releases, publications and references are provided.

Statistical resources are available via:

- Publication Catalogue
 - which lists the latest editions of publications released by DOS at <http://www.singstat.gov.sg/pubn/catalog.html>. All softcopy DOS publications are available for free downloading. Statistical tables of DOS publications in Excel format are also available.
- Advance Release Calendar
 - which covers key Singapore economic indicators.

The website also provides a convenient gateway to international statistical websites under the “Statistical Resources” section:

- Guide to International Statistics
 - which covers international databases, classifications and links, and statistical terms and definitions.
- IMF Dissemination Standards Bulletin Board
 - which provides metadata about Singapore's key indicators in the real, fiscal, financial and external sectors, including dissemination practices and information about pre-release access of current indicators.

SingStat Express

SingStat Express is a personalised data delivery service which sends the latest press releases, notices of publication, newsletter, occasional and information papers to subscribers via email. SMS alert service is also available to local users. Subscription details are available from the *Statistics Singapore Website* (www.singstat.gov.sg/express).

SINGAPORE DEPARTMENT OF STATISTICS

INFORMATION DISSEMINATION SERVICES (*cont'd*)

Really Simple Syndication

Really Simple Syndication (RSS) is an easy way to stay updated on the latest statistical news released via the *Statistics Singapore Website*. The SingStat RSS feed delivers statistical news highlights and hyperlinks to the source documents whenever the updates are posted. More information is available at <http://www.singstat.gov.sg/svcs/rss.html>.

Data on SMS

Data on SMS is a free mobile service for local data users to receive the latest data for key indicators via SMS. Simply key **data** and SMS to **74688** (or SGOVT) for the service. More information is available at <http://www.singstat.gov.sg/svcs/dataonsms.html>.

SingStat Time Series (STS) Online System

The *SingStat Time Series (STS) Online System* is an internet-accessible time series retrieval system. The *STS* includes more than 7,000 historical data series on Singapore society and economy from several domains, including national accounts, balance of payments, investments, finance, labour, prices, business expectations, trade, manufacturing, tourism, demography, health and education.

Besides the usual monthly, quarterly and annual data, *STS* includes also seasonally adjusted data series for key economic indicators providing for a better analysis and understanding of current economic trends. The *STS* also offers:

- Web-based search engine that is easy to use;
- “Bookmark” features that enable users to save and organise links in their personalised portals.

Subscription to *STS* is opened to local and overseas users. More information on *STS* is available via *Statistics Singapore Website*. For enquiries, please contact our Department at **Tel: 6332-7119**.

E-survey

The *E-survey* enables business organisations to complete and submit their survey forms through the internet. Using secured encryption protocols, the *E-survey* ensures that the information transmitted through the net is secured and protected. The system features online helps and validation checks to assist respondents in completing their survey forms. With the *E-survey*, respondents can do away with the tedious paper work and manual tasks of mailing or faxing their survey returns to the Department.

Statistical Enquiries and Feedback

If you have any statistical enquiries or comment or suggestions on our statistical publications and electronic services, you are welcomed to:

 E-mail us at info@singstat.gov.sg

 Fax to us at **(65) 6332-7689**

 Call us at **1800-3238118* (local callers)**

(65) 6332-7738 (overseas callers)

* Calls from mobile telephone lines to 1800 local toll free number may be subject to mobile airtime charges as imposed by the relevant mobile service provider.
