³ Comprises professional, scientific & technical and administrative & support service activities, e.g. legal services, accounting activities, management and management consultancy services, architectural, engineering and technical services, employment agencies and travel agencies

Explanatory Notes

Introduction

The Quarterly Business Receipts Index (QBRI) for the services sector (excluding wholesale and retail trade, hotels and restaurants) measures the short-term changes in the amount of business or operating receipts on a quarterly basis. The QBRI is compiled at current prices.

Business or operating receipts is the income earned from business operations i.e. includes income from services rendered, sale of goods, commission fees, and rental of premises and machinery and equipment.

The QBRI is re-based at regular intervals to reflect changes in the structure of the services sector. The QBRI series was re-based to reference year 2008 with effect from 1Q2009 and the weights were also updated.

Data Collection

Data on business receipts are primarily sourced from the Department's Quarterly Survey of Services (QSS) and Survey of Quarterly National Income Estimates.

Business receipts of financial and insurance services are compiled through surveys conducted by the Monetary Authority of Singapore's (MAS) Research and Statistics Unit.

The Department has also incorporated administrative data in the compilation of the QBRI.

The 2008-based QBRI is compiled based on survey data and administrative records of more than 7,000 enterprises.

Index Compilation

The QBRI at detailed industry level is computed by dividing the industry's total business receipts for that quarter by the industry's average quarterly receipts in base year 2008. The overall QBRI is then computed by combining the indices at industry level using the weights of the respective industries, which represent their relative importance in the overall services sector.
