

# Accessing More Data with Ease via SingStat Table Builder

*Plus tips to quickly download updates to preferred data tables*

Two new functions are now available to facilitate the download of time series data tables from the SingStat Table Builder ([www.singstat.gov.sg/tablebuilder](http://www.singstat.gov.sg/tablebuilder)). Read on to find out how you may tap on these features!

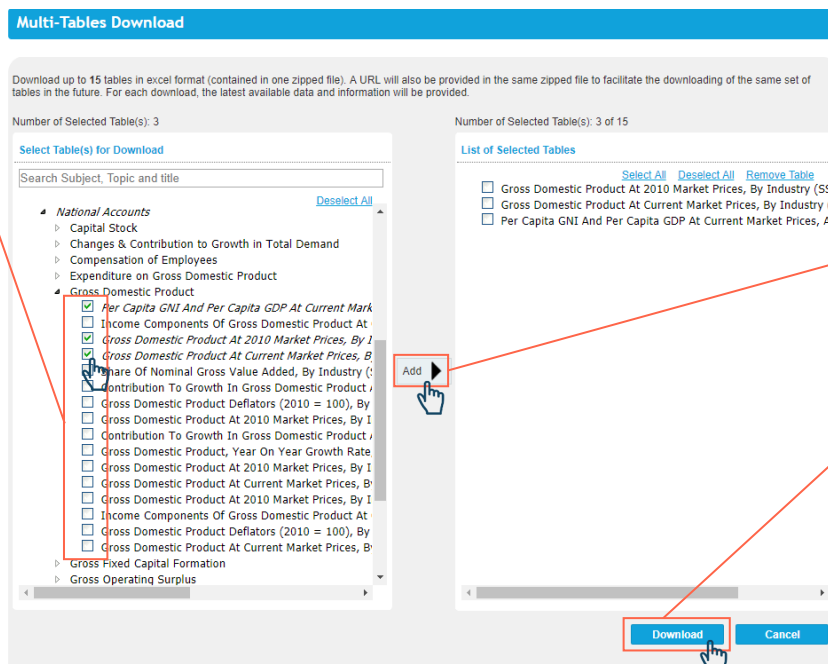

## Multi-Tables Download Function

The Multi-Tables Download function in the SingStat Table Builder allows you to download up to 15 data tables at-one-go. To use this feature, simply access it from the horizontal navigation bar on the SingStat Table Builder Homepage. The table selection

screen will be displayed. On this screen, select the tables you wish to download from the left panel and add them to the List of Selected Tables on the right panel. When you have completed your selection, click on the Download button.

1. Check the table(s) you wish to download

2. Add selected table(s) to the right panel

3. Click on 'Download' to proceed

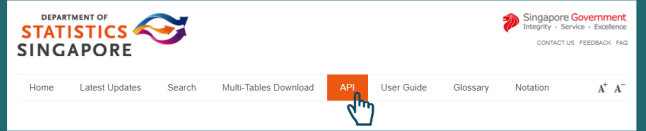

A zipped file will be generated. It will contain the data tables you have selected neatly formatted in an Excel file. The first tab-sheet in the file lists the tables you have selected for easy access to the individual tables in the file.

If you wish to download the latest updated data for the same set of tables in the future, you may use the unique URL indicated in Text file.

No.	Subject	Title
1	National Accounts	<a href="#">Per Capita GNI And Per Capita GDP At Current Market Prices, Annual</a>
2	National Accounts	<a href="#">Gross Domestic Product At 2010 Market Prices, By Industry (SSIC 2015), Annual</a>
3	National Accounts	<a href="#">Gross Domestic Product At Current Market Prices, By Industry (SSIC 2015), Annual</a>

This URL may be reused to download the selected set of tables in the future. Tables will be downloaded with the latest available data and information at the point of download.

## Application Programming Interface (API)

You can download commonly accessed tables in CSV and JSON formats using the API function in the SingStat Table Builder. To view the list of tables with API access, click on the API tab. From the list of tables with API access, you may

copy the API URL by right-clicking on the respective links to the CSV or JSON file and plugging them into your preferred programme. To view the formatted data tables, you may click on the titles from the API list.

Click to download the tables in CSV or JSON formats.

To extract the API endpoint URL, right-click and click on 'Copy link address'.

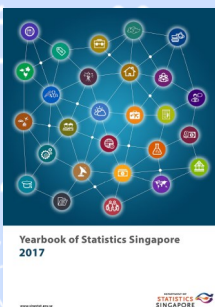

API

Search for the required tables by entering keywords and retrieve commonly accessed tables from the SingStat Table Builder in CSV or JSON formats using this API function. If there are other tables that you would like to obtain using the API function, please email [info@singstat.gov.sg](mailto:info@singstat.gov.sg)

### Yearbook of Statistics Singapore (YOS) 2017 has been released!

YOS 2017 provides a comprehensive and current statistical view of the key socio-demographic and economic characteristics of Singapore with over 270 statistical tables. The **infographics** featured in the chapter write-ups provide interesting highlights.

The inclusion of relevant **SingStat Table Builder** links for the YOS tables facilitates users' access to historical data series.

Access the YOS 2017 [here!](#)
