² Seasonally adjusted

³ Include department stores cum supermarkets (e.g. hypermarkets)

⁴ Retail stores which sell food & beverages that are generally not meant for immediate consumption on their premises

RETAIL SALES AND SALES OF FOOD & BEVERAGE SERVICES

Retail Sales

- Retail sales (seasonally adjusted) decreased 1.0% in May 2017 over the previous month. Excluding motor vehicles, retail sales declined 3.0%.
- Compared to May 2016, retail sales increased 0.9% in May 2017. Excluding motor vehicles, retail sales rose 0.6%.
- The total retail sales value in May 2017 was estimated at \$3.7 billion, similar to May 2016.

Sales of Food & Beverage Services

- Sales of food & beverage services (seasonally adjusted) declined 0.2% in May 2017 over the previous month.
- Compared to the same period last year, sales of food & beverage services went down 3.6% in May 2017.
- The total sales value of food & beverage services in May 2017 was estimated at \$689 million, lower than the \$715 million in May 2016.

Note: The year-on-year growth rate may differ from that derived using values which are rounded to the nearest billion dollars.

RETAIL SALES BY INDUSTRY

Month-on-Month Change (Seasonally Adjusted)

After seasonal adjustment, retail sales of wearing apparel & footwear decreased 10.5% in May 2017 over April 2017 (Table 1). Similarly, retail sales of recreational goods, watches & jewellery, petrol service stations, department stores, computer & telecommunications equipment, food retailers, medical goods & toiletries and optical goods & books declined between 0.1% and 9.0%.

Conversely, retail sales of motor vehicles, furniture & household equipment, mini-marts & convenience stores and supermarkets increased between 0.5% and 8.0% in May 2017 over the previous month.

Explanatory Notes

Introduction

The Retail Sales Index (RSI) and Food & Beverage Services Index (FSI) measure the short-term performance of retail and food & beverage (F&B) services industries based on the sales records of retail and F&B services establishments. Sales figure refers to the value of retail goods or food & beverages sold to consumers during the month, excluding taxes on products such as Goods and Services Tax (GST), Additional Registration Fee (ARF) and Certificates of Entitlement (COE).

The RSI and FSI are presented at both current prices and constant prices. The indices at current prices measure the changes of sales values which can result from changes in both price and quantity. By removing the price effect, the indices at constant prices measure the changes in the volume of economic activity.

To reflect changes in the structure of retail trade and F&B services industries, the coverage and weighting patterns of the RSI and FSI series are revised at regular intervals. These two indices have been re-based from reference year 2010 to 2014, the sixth re-basing exercise of the series. The new RSI and FSI series (2014=100) have been released with effect from Jan 2015 report.

Data Collection

Data for the compilation of the indices are primarily obtained from the results of the monthly surveys of retail and F&B services establishments respectively. Retail establishments refer to those selling merchandise directly to the consumers. F&B services establishments are those selling prepared food and drinks for in-premises consumption or on a take-away basis.

Index Compilation

To derive the RSI/FSI at detailed industry level, the monthly sales for that industry is divided by the average monthly sales for the same industry in the base year. The overall RSI/FSI is then computed by combining the sales indices of the detailed industries, using the weights to measure each industry's relative importance in the overall retail/F&B services industry.

To derive the indices at constant prices, the sales indices at current prices at detailed industry level are first deflated by appropriate price indices. These component indices at constant prices are then weighted and aggregated to derive the overall indices at constant prices.

Seasonal Adjustment

Seasonal effects are observed in both the RSI and FSI as there are usually intra-year periodic variations that repeat during the fixed period of time every year. To better reflect the underlying trend of the monthly sales, both indices are seasonally adjusted to remove the seasonal effects.
