

## PRESS RELEASE

### Business Receipts Index Fourth Quarter 2025

The Business Receipts Index (BRI) for the services industries (excluding Wholesale Trade, Retail Trade, Accommodation and Food Services) is compiled quarterly and measures how well the services industries are doing based on quarterly business receipts. The BRI provides insights on the short-term performance of the services industries, which can guide business decisions and policy choices.

#### BUSINESS RECEIPTS OF SERVICES INDUSTRIES<sup>1</sup>

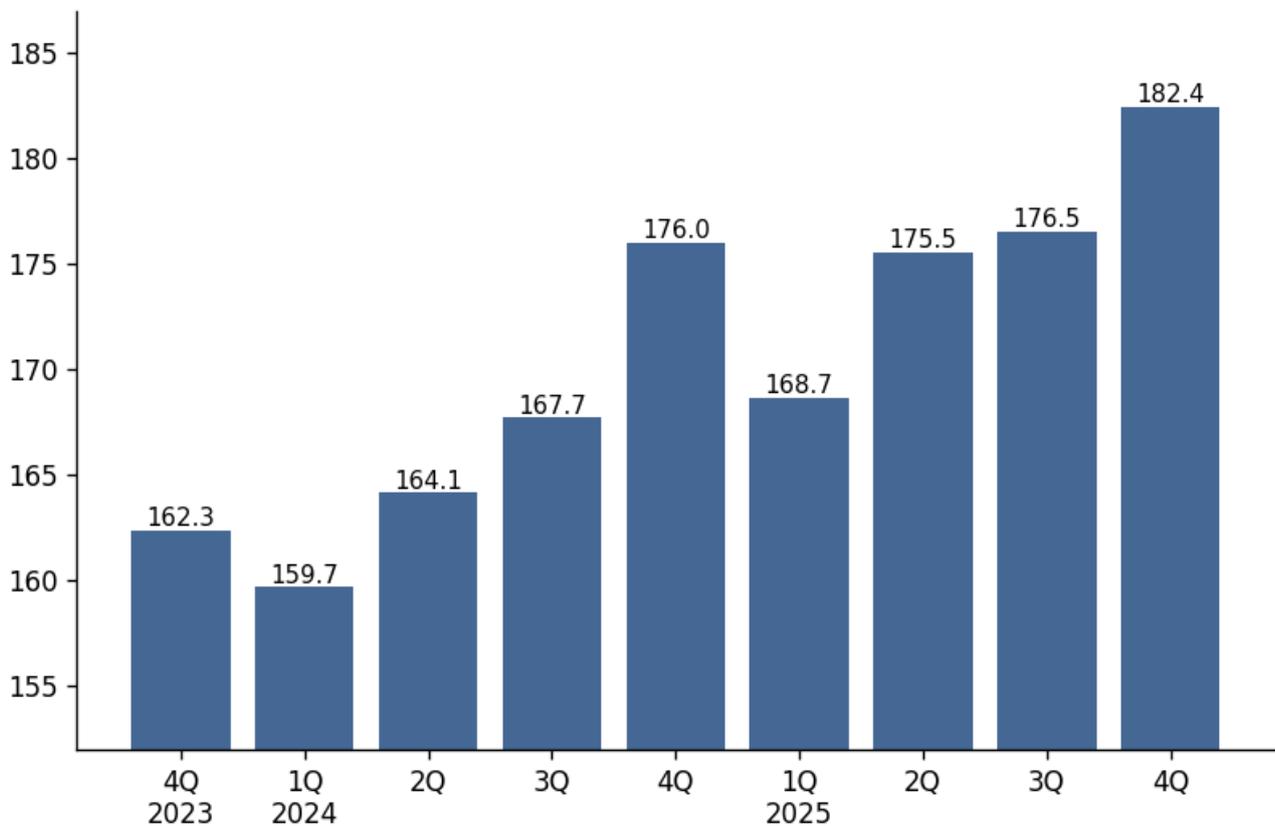

**Year-on Year**

▲ **+3.6%**

**Quarter-on-Quarter**  
 (Non-Seasonally adjusted)

▲ **+3.3%**

#### Business Receipts Index<sup>1</sup>, 4Q 2023 - 4Q 2025

<sup>1</sup>Excludes Wholesale Trade, Retail Trade, Accommodation and Food Services.

## OVERVIEW – SERVICE INDUSTRIES

Overall business receipts of the services industries (excluding Wholesale Trade, Retail Trade, Accommodation and Food Services) increased 3.6% on a year-on-year basis in the fourth quarter of 2025. All industries, except for Transportation & Storage and Administrative & Support Services, registered higher business receipts.

Compared to the previous quarter, overall business receipts (non-seasonally adjusted) rose 3.3% in the fourth quarter of 2025. All industries, except for Education and Health & Social Services, registered higher business receipts.

### Year-on-Year Change

The Recreation & Personal Services industry reported a 9.2% growth in revenue, mainly driven by the arts, entertainment and recreation (including gaming) segment.

The Professional Services industry recorded an increase of 6.1% in turnover, largely attributed to higher revenue from advertising and market research, as well as research and development activities.

On the other hand, the Transportation & Storage industry registered a 3.5% decrease in receipts, mainly attributed to shipping companies and freight transport arrangement services.

### Quarter-on-Quarter Change (Non-Seasonally Adjusted)

The Professional Services industry grew by 9.1%, mainly due to increased business receipts reported by head offices and management consultancies.

Similarly, the Real Estate industry registered a 3.6% increase in earnings, with all key segments such as real estate management and agencies registering high turnover.

Conversely, the Education industry contracted by 4.6%, largely attributed to a decline in receipts reported by universities from the tuition fees received in 3Q 2025.

<sup>3</sup> Comprises arts, entertainment & recreation, activities of membership organisations (e.g., business and professional membership organisations, religious organisations and interest groups), repair of computers, personal and household goods and vehicles and other personal services activities.

## EXPLANATORY NOTES

### Introduction

The Business Receipts Index (BRI) for the services industries (excluding Wholesale Trade, Retail Trade, Accommodation and Food Services) measures the short-term changes in the amount of business or operating revenue on a quarterly basis. The BRI is compiled at current prices.

Business or operating revenue is the income earned from business operations (i.e., includes income from services rendered, sale of goods, commission fees as well as rental of premises and machinery & equipment).

To reflect the changes in the structure of the services industries over the years, the weighting pattern of the index series is revised regularly. The BRI series have been re-based from base year 2008 to 2014. The new BRI series (2014=100) has been released with effect from 1Q2015 report.

### Data Collection

Data for the compilation of the index is sourced from administrative data as well as the Quarterly Survey of Services (QSS) and Survey of Quarterly National Income Estimates conducted by the department.

The 2014-based BRI is compiled based on survey and administrative records of more than 11,000 enterprises.

### Index Compilation

To derive the BRI at detailed industry level, the quarterly business receipts for that industry is divided by the average quarterly business receipts for the same industry in the base year.

The overall BRI is then computed by combining the indices of the detailed industries, using weights which measure each industry's relative importance in the overall services sector.
