The Act is available in the Department's Website (www.singstat.gov.sg).

Import Price Index (2018 = 100) December 2019

Month-on-Month Change

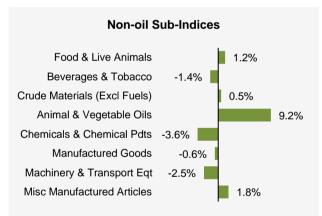

The Import Price Index fell 0.6% in December 2019, extending the 1.1% decrease in November 2019. The Oil index declined 1.3%, following the 2.0% decrease in the previous month. The Non-oil index fell 0.3%, after declining 0.8% in November 2019.

For the Non-oil sub-indices, declines were led by the Chemicals & Chemical Products (-0.8%) and Machinery & Transport Equipment (-0.4%) indices. The decreases were partially offset by increases in the Animal & Vegetable Oils (5.2%) index, attributed mainly to higher prices of crude palm oil, and the Food & Live Animals (0.6%) index.

Year-on-Year Change

The Import Price Index fell 2.3% in December 2019 from a year ago, extending the 5.1% decrease in November 2019. The Oil and Non-oil indices fell 3.8% and 1.8% respectively.

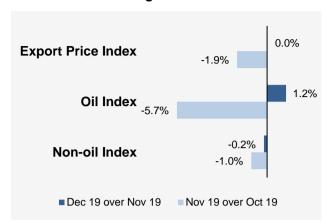

For the Non-oil sub-indices, lower prices of Chemicals & Chemical Products (-3.6%), Machinery & Transport Equipment (-2.5%), Beverages & Tobacco (-1.4%) and Manufactured Goods (-0.6%) were partially offset by higher prices of Animal & Vegetable Oils (9.2%), Miscellaneous Manufactured Articles (1.8%), Food & Live Animals (1.2%) and Crude Materials (0.5%).

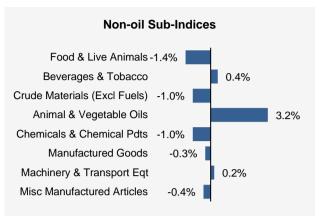

Annual Change

The Import Price Index fell 1.0% in 2019 over 2018, after rising 4.9% in 2018. Lower prices of Animal & Vegetable Oils (-9.7%), Oil (-6.5%), Chemicals & Chemical Products (-1.4%) and Manufactured Goods (-0.1%) were partially offset by higher prices of Miscellaneous Manufactured Articles (2.0%), Food & Live Animals (1.5%), Machinery & Transport Equipment (1.3%), Crude Materials (1.2%) and Beverages & Tobacco (0.4%).

Export Price Index (2018 = 100) December 2019

Month-on-Month Change

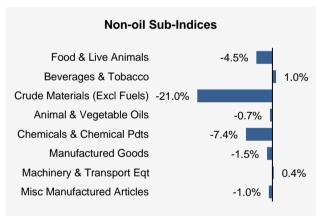

The Export Price Index remained unchanged in December 2019, after declining 1.9% in November 2019. The Oil index rose 1.2%, in contrast to the 5.7% decrease in the previous month. The Non-oil index fell 0.2%, after the 1.0% decline in November 2019.

For the Non-oil sub-indices, declines were led by the Chemicals & Chemical Products (-1.0%) index, due mainly to lower prices of ethylene polymers, and the Miscellaneous Manufactured Articles (0.4%) index. The decreases were partially offset by increases in the Beverages & Tobacco (0.4%) and Machinery & Transport Equipment (0.2%) indices.

Year-on-Year Change

The Export Price Index fell 2.1% in December 2019 from a year ago, extending the 5.7% decrease in November 2019. The Oil and Non-oil indices fell 3.8% and 1.7% respectively.

For the Non-oil sub-indices, lower prices of Crude Materials (-21.0%), Chemicals & Chemical Products (-7.4%), Food & Live Animals (-4.5%), Manufactured Goods (-1.5%), Miscellaneous Manufactured Articles (-1.0%) and Animal & Vegetable Oils (-0.7%) were partially offset by higher prices of Beverages & Tobacco (1.0%) and Machinery & Transport Equipment (0.4%).

Annual Change

The Export Price Index fell 1.4% in 2019 over 2018, after rising 3.2% in 2018. Lower prices of Crude Materials (-9.4%), Oil (-7.6%), Chemicals & Chemical Products (-5.2%), Animal & Vegetable Oils (-2.9%), Food & Live Animals (-2.4%) and Manufactured Goods (-1.3%) were partially offset by higher prices of Beverages & Tobacco (2.6%), Machinery & Transport Equipment (1.8%) and Miscellaneous Manufactured Articles (1.8%).

Technical Note

The **Import Price Index (IPI)** is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at cif (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2018.

The **Export Price Index (EPI)** measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as free on board prices. The weights of the index are derived from the distribution of export by commodity in 2018.

Index Formula

The 2018-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2018. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2012-Based Price Index Series to the New 2018-Based Price Index Series

The IPI and EPI have been rebased from base year 2012 to base year 2018. To facilitate comparison of the historical price indices across base years, the old 2012-based series are linked to the new 2018-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2018-based index in 2018 to the annual 2012-based index in 2018.

Example: Linking the old Iron & Steel Index series for IPI prior to 2018, to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)	Linked Coefficient		
2018	93.4	100.0	100.0 ÷ 93.4 = 1.071		

2) Re-scaling the old series to the 2018-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)
2016	Dec	84.0	84.0 x 1.071 = 90.0
2017	Jan	85.6	85.6 x 1.071 = 91.7

Linking Method for Maintaining the Old Index Reference Period

To continue the old 2012-based index series going forward in time, re-scale the new 2018-based index series to the old base year 2012 level, via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2012-based index in 2018 to the annual 2018-based index in 2018.

Example: Linking the new 2018-based Iron & Steel Index series for IPI to the 2012-based Iron & Steel Index (2012=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)	Linked Coefficient		
2018	100.0	93.4	93.4 ÷ 100.0 = 0.934		

2) Re-scaling the new series to the 2012-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)		
2019	Jan	98.6	98.6 x 0.934 = 92.1		
2019	Feb	102.4	102.4 x 0.934 = 95.6		

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at https://www.singstat.gov.sg/publications/economy/import-export-price-indices or through the QR code below:

NOTES

The Import and Export Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.
