Import Price Index (2018 = 100) July 2021

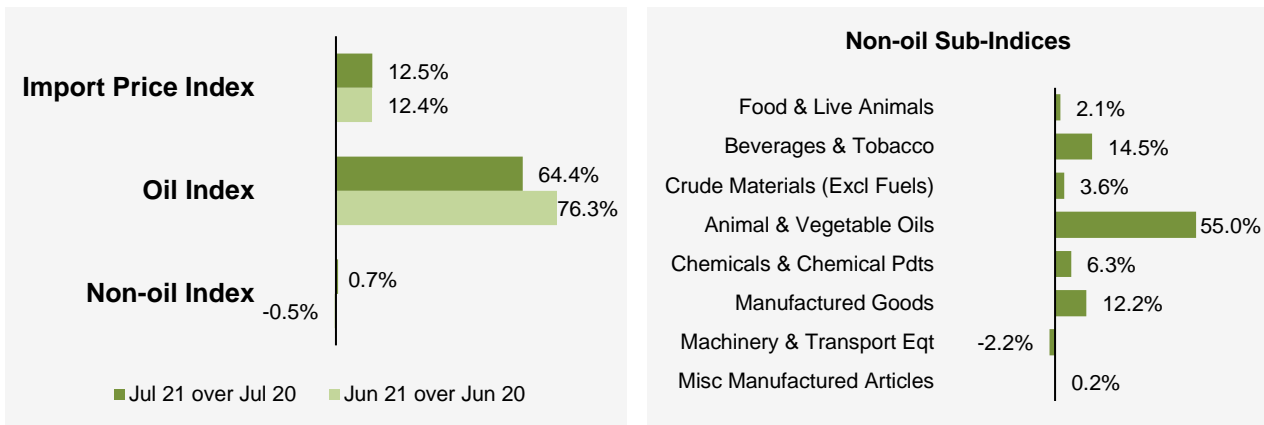

Month-on-Month Change

The Import Price Index rose 2.0% in July 2021, following the 2.1% increase in June 2021. The Oil index grew by 4.6%, after increasing 7.2% in the previous month. The Non-oil index rose 1.0% in July 2021, extending the 0.4% gain in June 2021.

All Non-oil sub-indices rose. The increases were led by the Manufactured Goods (2.1%), Chemicals & Chemical Products (1.4%) and Machinery & Transport Equipment (0.9%) indices, due mainly to higher prices of iron & steel products, organic chemicals and integrated circuits respectively.

Year-on-Year Change

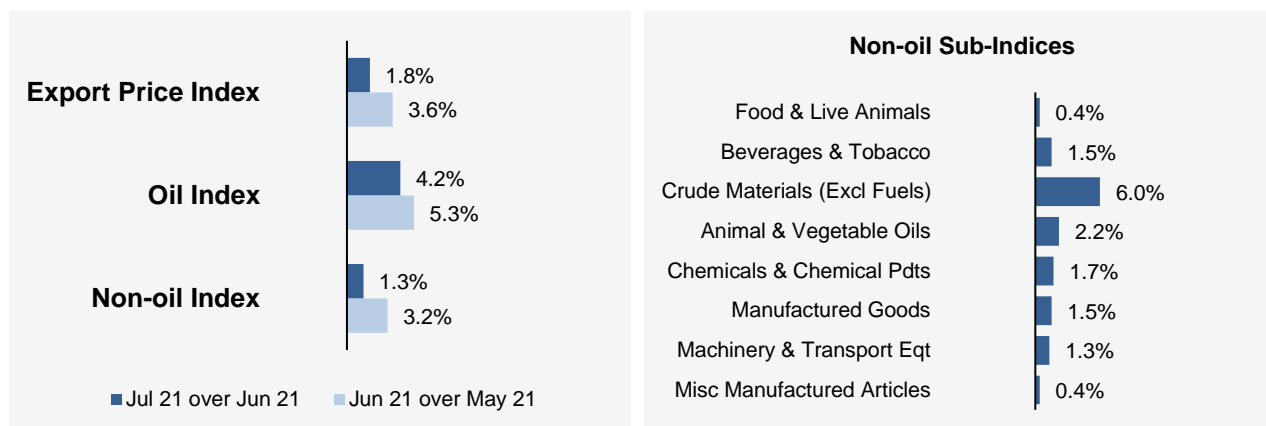

The Import Price Index rose 12.5% in July 2021 from a year ago, extending the 12.4% gain in June 2021. The Oil and Non-oil indices increased 64.4% and 0.7% respectively.

For the Non-oil sub-indices, higher prices of Animal & Vegetable Oils (55.0%), Beverages & Tobacco (14.5%), Manufactured Goods (12.2%), Chemicals & Chemical Products (6.3%), Crude Materials (3.6%), Food & Live Animals (2.1%) and Miscellaneous Manufactured Articles (0.2%) were partially offset by lower prices of Machinery & Transport Equipment (-2.2%).

Export Price Index (2018 = 100) July 2021

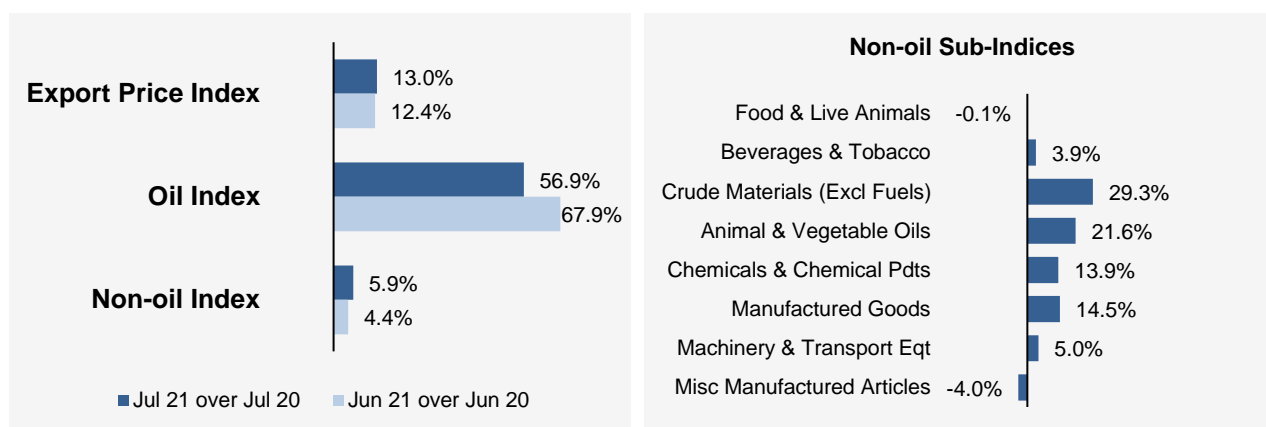

Month-on-Month Change

The Export Price Index increased 1.8% in July 2021, following the 3.6% rise in June 2021. The Oil index rose 4.2%, extending the 5.3% increase in the previous month. The Non-oil index grew by 1.3% in July 2021, extending the 3.2% gain in June 2021.

All Non-oil sub-indices rose. The increases were led by the Crude Materials (6.0%), Chemicals & Chemical Products (1.7%) and Machinery & Transport Equipment (1.3%) indices, due mainly to higher prices of crude rubber, organic chemicals and integrated circuits respectively.

Year-on-Year Change

The Export Price Index increased 13.0% in July 2021 from a year ago, following the 12.4% rise in June 2021. The Oil and Non-oil indices went up 56.9% and 5.9% respectively.

For the Non-oil sub-indices, higher prices of Crude Materials (29.3%), Animal & Vegetable Oils (21.6%), Manufactured Goods (14.5%), Chemicals & Chemical Products (13.9%), Machinery & Transport Equipment (5.0%) and Beverages & Tobacco (3.9%) were partially offset by lower prices of Miscellaneous Manufactured Articles (-4.0%) and Food & Live Animals (-0.1%).

Technical Note

The **Import Price Index (IPI)** is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at cif (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2018.

The **Export Price Index (EPI)** measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as free on board prices. The weights of the index are derived from the distribution of export by commodity in 2018.

Index Formula

The 2018-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2018. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2012-Based Price Index Series to the New 2018-Based Price Index Series

The IPI and EPI have been rebased from base year 2012 to base year 2018. To facilitate comparison of the historical price indices across base years, the old 2012-based series are linked to the new 2018-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2018-based index in 2018 to the annual 2012-based index in 2018.

Example : Linking the old Iron & Steel Index series for IPI prior to 2018, to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)	Linked Coefficient
2018	93.4	100.0	$100.0 \div 93.4 = 1.071$

2) Re-scaling the old series to the 2018-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)
2016	Dec	84.0	$84.0 \times 1.071 = 90.0$
2017	Jan	85.6	$85.6 \times 1.071 = 91.7$

Linking Method for Maintaining the Old Index Reference Period

To continue the old 2012-based index series going forward in time, re-scale the new 2018-based index series to the old base year 2012 level, via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2012-based index in 2018 to the annual 2018-based index in 2018.

Example : Linking the new 2018-based Iron & Steel Index series for IPI to the 2012-based Iron & Steel Index (2012=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)	Linked Coefficient
2018	100.0	93.4	$93.4 \div 100.0 = 0.934$

2) Re-scaling the new series to the 2012-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)
2019	Jan	98.6	$98.6 \times 0.934 = 92.1$
2019	Feb	102.4	$102.4 \times 0.934 = 95.6$

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at <https://www.singstat.gov.sg/publications/economy/import-export-price-indices> or through the QR code below:

- nes not elsewhere specified
- nil or negligible

NOTES

The Import and Export Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.
