Statistical activities conducted by the Singapore Department of Statistics are governed by the provisions of the Statistics Act (Cap. 317). The Act guarantees the confidentiality of information collected from individuals and companies. It spells out the legislative authority and responsibility of the Chief Statistician. The Act is available in the Department's Website (www.singstat.gov.sg).

Import Price Index (2018 = 100) June 2020

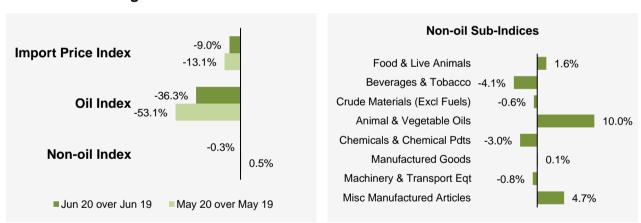

Month-on-Month Change

The Import Price Index rose 2.9% in June 2020, in contrast to the 0.3% decrease in May 2020. The Oil index rose 27.0%, extending the 7.9% increase in the previous month. The Non-oil index fell 1.0%, following the 1.5% decrease in May 2020.

All Non-oil sub-indices were lower except for the Animal & Vegetable Oils index which rose 2.3%. The declines were led by the Machinery & Transport Equipment (-1.1%) and Miscellaneous Manufactured Articles (-1.0%) indices, due mainly to lower prices of memory chips and professional instruments respectively.

Year-on-Year Change

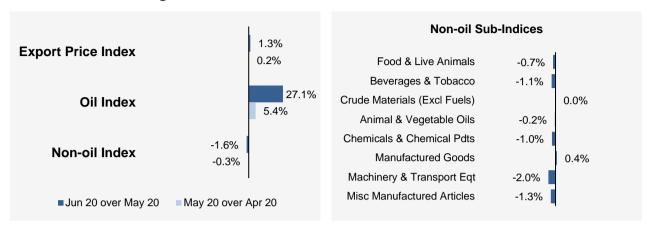

The Import Price Index fell 9.0% in June 2020 from a year ago, extending the 13.1% decline in May 2020. The Oil and Non-oil indices fell 36.3% and 0.3% respectively.

For the Non-oil sub-indices, lower prices of Beverages & Tobacco (-4.1%), Chemicals & Chemical Products (-3.0%), Machinery & Transport Equipment (-0.8%), and Crude Materials (-0.6%) were partially moderated by higher prices of Animal & Vegetable Oils (10.0%), Miscellaneous Manufactured Articles (4.7%), Food & Live Animals (1.6%) and Manufactured Goods (0.1%).

Export Price Index (2018 = 100) June 2020

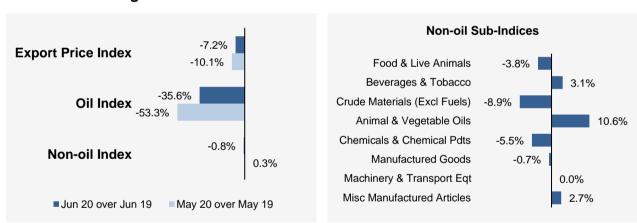

Month-on-Month Change

The Export Price Index increased 1.3% in June 2020, extending the 0.2% increase in May 2020. The Oil index rose 27.1%, following the 5.4% increase in the previous month. The Non-oil index fell 1.6%, after the 0.3% decline in May 2020.

For the Non-oil sub-indices, decreases led by the Machinery & Transport Equipment (-2.0%) and Chemicals & Chemical Products (-1.0%) indices, due mainly to lower prices of integrated circuits and polyethylene products respectively, were partially offset by the increase in the Manufactured Goods (0.4%) index.

Year-on-Year Change

The Export Price Index fell 7.2% in June 2020 from a year ago, following the 10.1% decrease in May 2020. The Oil and Non-oil indices declined 35.6% and 0.8% respectively.

For the Non-oil sub-indices, lower prices of Crude Materials (-8.9%), Chemicals & Chemical Products (-5.5%), Food & Live Animals (-3.8%) and Manufactured Goods (-0.7%) were partially moderated by higher prices of Animal & Vegetable Oils (10.6%), Beverages & Tobacco (3.1%) and Miscellaneous Manufactured Articles (2.7%).

Technical Note

The **Import Price Index (IPI)** is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at cif (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2018.

The **Export Price Index (EPI)** measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as free on board prices. The weights of the index are derived from the distribution of export by commodity in 2018.

Index Formula

The 2018-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2018. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2012-Based Price Index Series to the New 2018-Based Price Index Series

The IPI and EPI have been rebased from base year 2012 to base year 2018. To facilitate comparison of the historical price indices across base years, the old 2012-based series are linked to the new 2018-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2018-based index in 2018 to the annual 2012-based index in 2018.

Example: Linking the old Iron & Steel Index series for IPI prior to 2018, to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)	Linked Coefficient		
2018	93.4	100.0	100.0 ÷ 93.4 = 1.071		

2) Re-scaling the old series to the 2018-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)
2016	Dec	84.0	84.0 x 1.071 = 90.0
2017	Jan	85.6	85.6 x 1.071 = 91.7

Linking Method for Maintaining the Old Index Reference Period

To continue the old 2012-based index series going forward in time, re-scale the new 2018-based index series to the old base year 2012 level, via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2012-based index in 2018 to the annual 2018-based index in 2018.

Example: Linking the new 2018-based Iron & Steel Index series for IPI to the 2012-based Iron & Steel Index (2012=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)	Linked Coefficient		
2018	100.0	93.4	93.4 ÷ 100.0 = 0.934		

2) Re-scaling the new series to the 2012-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)		
2019	Jan	98.6	98.6 x 0.934 = 92.1		
2019	Feb	102.4	102.4 x 0.934 = 95.6		

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at https://www.singstat.gov.sg/publications/economy/import-export-price-indices or through the QR code below:

NOTES

The Import and Export Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.
