Import Price Index (2023 = 100) October 2025

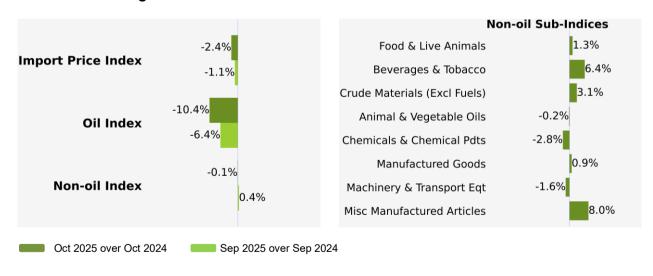

Month-on-Month Change

The Import Price Index fell 0.7% in October 2025, in contrast to the 0.9% increase in September 2025. The Oil index dropped 2.9%, reversing the 1.9% increase in the previous month, mainly led by lower prices of petroleum and products. The Non-oil index fell 0.1% in October 2025, after the 0.6% increase in September 2025.

The decrease in the Non-oil index was due to the Machinery & Transport Equipment and Crude Materials indices. The decreases were partially offset by increases in the Miscellaneous Manufactured Articles, Chemicals & Chemical Products, Manufactured Goods, Beverages & Tobacco, Animal & Vegetable Oils and Food & Live Animals indices.

Year-on-Year Change

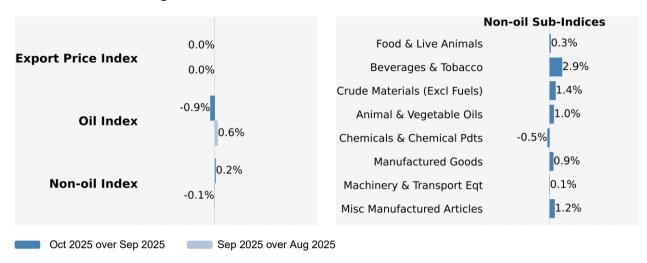

The Import Price Index fell 2.4% in October 2025 from a year ago, following the 1.1% decrease in September 2025. The Oil Index declined 10.4%, mainly due to lower prices of petroleum and products, while the Non-oil Index slipped 0.1%.

Among the Non-oil sub-indices, the decrease was due to the Machinery & Transport Equipment index, contributed by lower prices of electrical machinery apparatus, as well as the Chemicals & Chemical Products and Animal & Vegetable Oils indices. The decreases were partially moderated by gains in the Miscellaneous Manufactured Articles, Beverages & Tobacco, Manufactured Goods, Food & Live Animals and Crude Materials indices.

Export Price Index (2023 = 100) October 2025

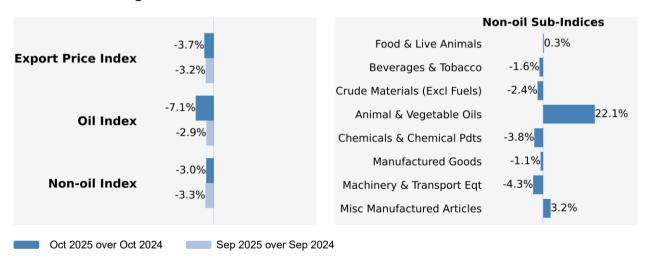

Month-on-Month Change

The Export Price Index was unchanged in October 2025, continuing the trend in September 2025. The Oil index fell 0.9%, reversing the 0.6% increase in the previous month. The Non-oil index rose 0.2% in October 2025, after the 0.1% decrease in September 2025.

The increase in the Non-oil index was due to the Miscellaneous Manufactured Articles index, attributed to higher prices of articles of precious/ semiprecious materials, as well as the Machinery & Transport Equipment, Beverages & Tobacco, Manufactured Goods, Crude Materials, Food & Live Animals and Animal & Vegetable Oils indices. The increases were partially offset by the decrease in the Chemicals & Chemical Products index.

Year-on-Year Change

The Export Price Index fell 3.7% in October 2025 from a year ago, following the 3.2% decrease in September 2025. The Oil and Non-oil indices decreased 7.1% and 3.0% respectively.

Among the Non-oil sub-indices, the decrease was mainly driven by the Machinery & Transport Equipment index, attributed to lower prices of electrical machinery apparatus, as well as the Chemicals & Chemical Products, Manufactured Goods, Crude Materials and Beverages & Tobacco indices. The decreases were partially moderated by increases in the Miscellaneous Manufactured Articles, Animal & Vegetable Oils and Food & Live Animals indices.

Technical Note

The **Import Price Index (IPI)** is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at CIF terms (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2023.

The **Export Price Index (EPI)** measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as Free on Board (FOB) prices. The weights of the index are derived from the distribution of export by commodity in 2023.

Index Formula

The 2023-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2023. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2018-Based Price Index Series to the New 2023-Based Price Index Series

The IPI and EPI have been rebased from base year 2018 to base year 2023. To facilitate comparison of the historical price indices across base years, the old 2018-based series are linked to the new 2023-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2018-based index in 2023.

Example: Linking the old Iron & Steel Index series for IPI prior to 2023, to the 2023-based Iron & Steel Index (2023=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)	Linked Coefficient		
2023	117.2	100.0	100.0 ÷ 117.2 = 0.853		

2) Re-scaling the old series to the 2023-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)
2021	Dec	130.3	130.3 x 0.853 = 111.1
2022	Jan	128.7	128.7 x 0.853 = 109.8

Rescaling the 2023-Based Index Series to Previous Years

To continue the old index series going forward in time, re-scale the new 2023-based index series to the old base year level, via a Rescaling Coefficient. The Rescaling Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2023-based index in the old base year.

Example: Rescaling the new 2023-based Iron & Steel Index series for IPI to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the rescaling coefficient

Base Year	Annual Iron & Steel Index in 2023	Annual Iron & Steel Index in 2018	Linked Coefficient
2023	100.0	85.3	100.0 ÷ 85.3 = 1.172

2) Re-scaling the new series to the 2018-based series using the Rescaling Coefficient

Year	Month	Iron & Steel Index (2023=100)	Iron & Steel Index (2018=100)		
2024	Jan	95.6	95.6 x 1.172 = 112.0		
2024	Feb	95.3	95.3 x 1.172 = 111.7		

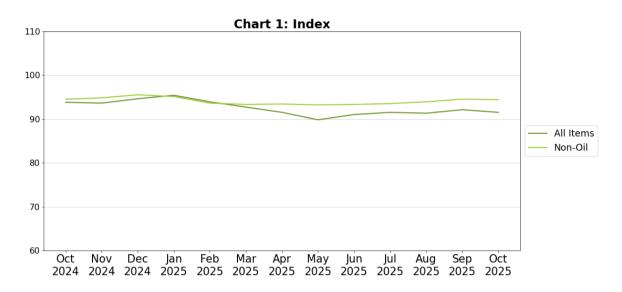

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

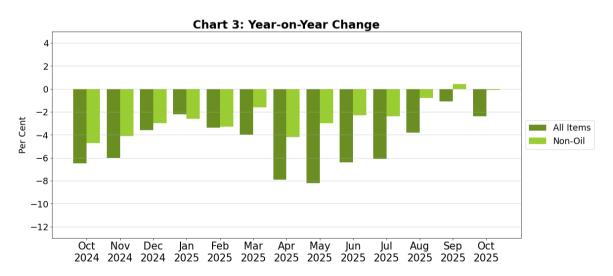

Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder).

SINGAPORE DEPARTMENT OF STATISTICS COMMUNICATIONS & INFORMATION SERVICES

The Singapore Department of Statistics (DOS) offers official statistics, data insights, visualisations, and statistical resources through user-friendly platforms.

SingStat Website

Visit this convenient gateway to access latest data and statistical information.

Data across the six major themes of Economy & Prices, Industry, Trade & Investment, Population, Households, and Society covering some 200 topics such as Gross Domestic Product, Consumer Price Index, Retail Sales and Food & Beverage Services Indices, Producer Price Indices, Business Expectations, Business Receipts Index, Trade in Services, Direct Investment, Population Indicators, Household Income, Household Expenditure, Deaths and Life Expectancy, Births and Fertility, Marriages and Divorces, and more.

Publications

- Statistics Singapore Newsletter features articles on latest key statistical activities, recent survey findings, and methodological improvements.
- Information Papers highlight conceptual and methodological changes and improvements in official statistics.
- Occasional Papers present statistical trends and observations on important social and economic issues to stimulate discussion and research.
- eBook of Statistics consolidates latest information and resources on key economic and socio-demographic domains.
- Singapore in Figures allows exploration of key economic and socio-demographic statistics through interactive dashboards.

Visualisations such as infographics and interactive dashboards with latest data, and videos to explain data and statistical concepts.

Businesses Insights Tool for Enterprises (BITE) serves businesses with bite-sized data for big decisions, giving firms insights on their customers, industries, and business performance.

Advance Release Calendar with dates of upcoming data and publication releases in the next six months.

SingStat Table Builder

Access over 2,400 data tables for free across various economic and socio-demographic domains from 70 public sector agencies. Watch the video to find out how you can easily access and customise data tables.

SingStat Express

Subscribe to receive alerts on the latest press releases, occasional/information papers, and newsletters.

SingStat Mobile App

Download the app for fast and convenient access to commonly used statistics from your mobile devices.

Over 300 charts are available across over 40 data categories for easy access to visualise data trends.

For statistical enquiries, you may reach us at:

mail: info@singstat.gov.sg or submit the Data Request Form

phone: 1800-323 8118* (Local users) or (65) 6332 7738 (Overseas users)

* Calls from mobile telephone lines to 1800 local toll-free number may be subject to mobile airtime charges as improved by the relevant mobile service provider.
