# IMPORT PRICE INDICES (2012 = 100)

## September 2018

### Import Price Index

#### *Change over previous month*

The Import Price Index rose 1.0 per cent in September 2018, after remaining unchanged in August 2018. The Oil index climbed 4.3 per cent, following the 0.4 per cent rise in the previous month, attributed mainly to higher prices of crude petroleum and diesel fuel & fuel oils. The Non-oil index fell 0.3 per cent in September 2018, extending the 0.1 per cent decrease in August 2018.

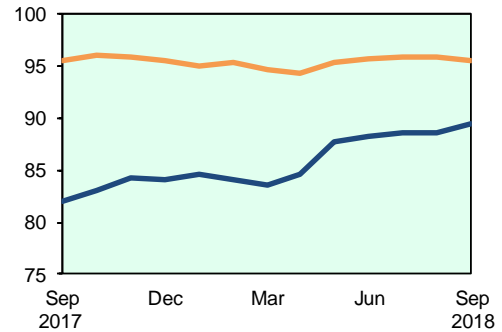

Among the Non-oil sub-indices, decreases led by the Machinery & Transport Equipment (-0.4 per cent) and Miscellaneous Manufactured Articles (-0.1 per cent) indices were partially moderated by increases led by the Chemicals & Chemical Products (0.5 per cent) and Crude Materials (0.1 per cent) indices.

#### *Change over same period of previous year*

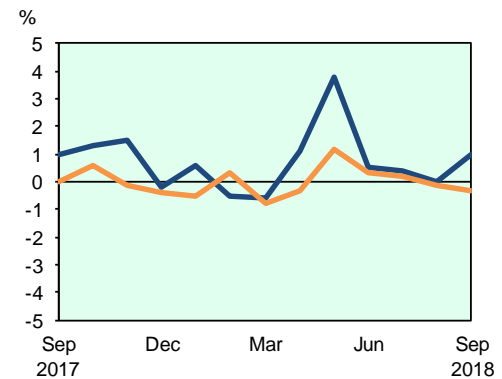

The Import Price Index climbed 9.2 per cent in September 2018 from a year ago, following the 9.2 per cent increase in August 2018. The Oil and Non-oil indices increased 41.1 per cent and 0.1 per cent respectively.

For the Non-oil sub-indices, higher prices of Chemicals & Chemical Products (6.0 per cent), Manufactured Goods (4.8 per cent) and Beverages & Tobacco (0.3 per cent) were partially offset by lower prices of Animal & Vegetable Oils (-13.8 per cent), Miscellaneous Manufactured Articles (-1.4 per cent), Machinery & Transport Equipment (-1.0 per cent), Crude Materials (-0.8 per cent) and Food & Live Animals (-0.6 per cent).

# EXPORT PRICE INDICES (2012 = 100)

## September 2018

### Export Price Index

#### *Change over previous month*

The Export Price Index rose 0.7 per cent in September 2018, following the 0.1 per cent increase in August. The Oil index went up 2.8 per cent, extending the 0.5 per cent gain in the previous month, due to higher prices of bunker fuel and high speed diesel fuel. The Non-oil index rose 0.1 per cent in September 2018, after remaining unchanged in August 2018.

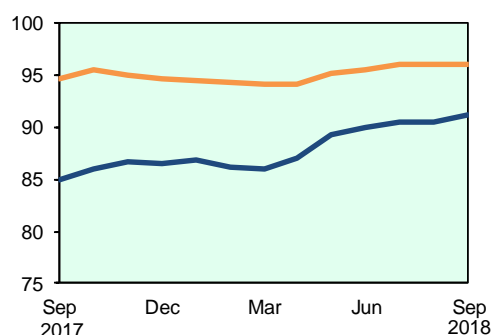

For the Non-oil sub-indices, increases led by the Machinery & Transport Equipment (0.2 per cent) and Chemicals & Chemical Products (0.2 per cent) indices were partially offset by decreases in the Manufactured Goods (-0.3 per cent) and Miscellaneous Manufactured Articles (-0.2 per cent) indices.

#### *Change over same period of previous year*

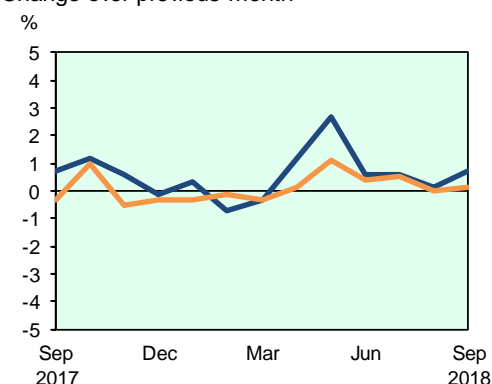

The Export Price Index increased 7.2 per cent in September 2018 over the previous year, similar to the gain in August 2018. The Oil and Non-oil indices rose 33.3 per cent and 1.6 per cent respectively.

Among the Non-oil sub-indices, increases in the Chemicals & Chemical Products (5.6 per cent), Food & Live Animals (2.7 per cent), Animal & Vegetable Oils (2.0 per cent), Manufactured Goods (1.4 per cent), Machinery & Transport Equipment (0.9 per cent) and Beverage & Tobacco (0.3 per cent) indices were partially moderated by decreases in the Crude Materials (-1.9 per cent) and Miscellaneous Manufactured Articles (-0.4 per cent) indices.

## TECHNICAL NOTE

The *Import Price Index (IPI)* is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at cif (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2012.

The *Export Price Index (EPI)* measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as free on board prices. The weights of the index are derived from the distribution of export by commodity in 2012.

### Index Formula

The 2012-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2012. The geometric mean (GM) formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean (AM) formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available

An Information Paper on the Rebasing of Import and Export Price Indices (2012=100) is available on the department's website at <https://www.singstat.gov.sg/ppi#Producer-and-International-Trade-Prices>.

### Measurement of Changes in Price Indices

*Change over previous month* compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements. As the price indices are found not to be seasonal, it is not necessary for seasonal adjustment to be carried out.

*Change over same period of previous year* measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

### Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

### Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website ([www.singstat.gov.sg/tablebuilder](http://www.singstat.gov.sg/tablebuilder)). Excel tables for this month's report are available at <https://www.singstat.gov.sg/publications/economy/import-export-price-indices> or through the QR code below:

-                nil or negligible

### **NOTES**

The Import and Export Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.
