Import Price Index (2018 = 100) September 2022

Month-on-Month Change

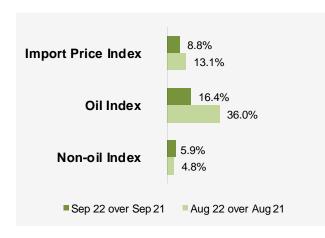

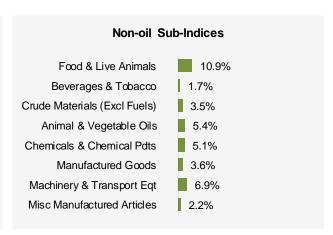

The Import Price Index went down 2.0% in September 2022, continuing the 1.5% decrease in August 2022. The Oil index fell 8.4%, adding to the 3.7% decline in the previous month. The Non-oil index gained 1.0% in September 2022, in contrast to the 0.5% decrease in August 2022.

Among the Non-oil sub-indices, increases were led by the Machinery & Transport Equipment (1.5%) index, mainly driven by higher prices of electrical machinery apparatus, and the Miscellaneous Manufactured Articles (0.3%) index. The increases were slightly offset by the decrease in the Animal & Vegetable Oils (-4.3%) index, due largely to lower prices of palm oil.

Year-on-Year Change

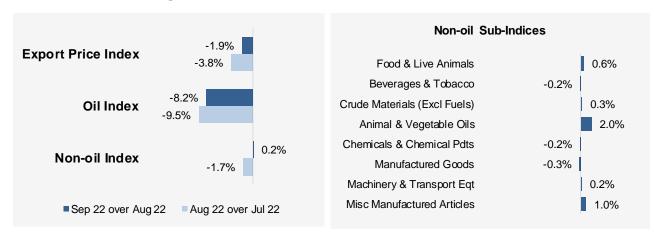

The Import Price Index rose 8.8% in September 2022 from a year ago, extending the 13.1% gain in August 2022. The Oil and Non-oil indices went up 16.4% and 5.9% respectively.

All Non-oil sub-indices increased. Higher prices were registered for Food & Live Animals (10.9%), Machinery & Transport Equipment (6.9%), Animal & Vegetable Oils (5.4%), Chemicals & Chemical Products (5.1%), Manufactured Goods (3.6%), Crude Materials (3.5%), Miscellaneous Manufactured Articles (2.2%) and Beverages & Tobacco (1.7%).

Export Price Index (2018 = 100) September 2022

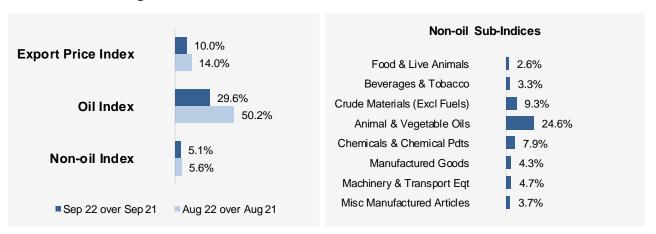

Month-on-Month Change

The Export Price Index declined 1.9% in September 2022, sustaining the 3.8% drop in August 2022. The Oil index slipped 8.2%, after contracting 9.5% in the previous month. The Non-oil index rose 0.2% in September 2022, reversing the 1.7% decrease in August 2022.

Among the Non-oil sub-indices, increases were led by the Miscellaneous Manufactured Articles (1.0%) index, primarily arising from higher prices of scientific instruments, and the Machinery & Transport Equipment (0.2%) index. The increases were partially offset by decreases in the Manufactured Goods (-0.3%) and the Chemicals & Chemical Products (-0.2%) indices.

Year-on-Year Change

The Export Price Index increased 10.0% in September 2022 from a year ago, extending the 14.0% gain in August 2022. The Oil and Non-oil indices rose 29.6% and 5.1% respectively.

All Non-oil sub-indices increased. Higher prices were registered for Animal & Vegetable Oils (24.6%), Crude Materials (9.3%), Chemicals & Chemical Products (7.9%), Machinery & Transport Equipment (4.7%), Manufactured Goods (4.3%), Miscellaneous Manufactured Articles (3.7%), Beverages & Tobacco (3.3%) and Food & Live Animals (2.6%).

Technical Note

The **Import Price Index (IPI)** is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at CIF terms (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2018.

The **Export Price Index (EPI)** measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as Free on Board (FOB) prices. The weights of the index are derived from the distribution of export by commodity in 2018.

Index Formula

The 2018-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2018. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2012-Based Price Index Series to the New 2018-Based Price Index Series
The IPI and EPI have been rebased from base year 2012 to base year 2018. To facilitate comparison
of the historical price indices across base years, the old 2012-based series are linked to the new 2018based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the
annual 2018-based index in 2018 to the annual 2012-based index in 2018.

Example: Linking the old Iron & Steel Index series for IPI prior to 2018, to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)	Linked Coefficient		
2018	93.4	100.0	100.0 ÷ 93.4 = 1.071		

2) Re-scaling the old series to the 2018-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)
2016	Dec	84.0	84.0 x 1.071 = 90.0
2017	Jan	85.6	85.6 x 1.071 = 91.7

Linking Method for Maintaining the Old Index Reference Period

To continue the old 2012-based index series going forward in time, re-scale the new 2018-based index series to the old base year 2012 level, via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2012-based index in 2018 to the annual 2018-based index in 2018.

Example: Linking the new 2018-based Iron & Steel Index series for IPI to the 2012-based Iron & Steel Index (2012=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)	Linked Coefficient		
2018	100.0	93.4	93.4 ÷ 100.0 = 0.934		

2) Re-scaling the new series to the 2012-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)		
2019	Jan	98.6	98.6 x 0.934 = 92.1		
2019	Feb	102.4	102.4 x 0.934 = 95.6		

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at https://www.singstat.gov.sg/publications/economy/import-export-price-indices or through the QR code below:

NOTATIONS

nes not elsewhere specified

- nil or negligible

NOTES

The Import and Export Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.

SINGAPORE DEPARTMENT OF STATISTICS COMMUNICATIONS & INFORMATION SERVICES

Singapore Department of Statistics (DOS) offers official statistics, data insights, visualisations and statistical resources through user-friendly platforms.

SingStat Website

Visit this convenient gateway to access latest data and statistical information.

Data across the six major themes of Economy, Industry, Trade & Investment, Population, Households and Society, covering some 200 topics such as Gross Domestic Product, Consumer Price Index, Retail Sales and Food & Beverage Services Indices, Producer Price Indices, Business Expectations, Business Receipts Index, Trade in Services, Direct Investment, Population Indicators, Household Income, Household Expenditure, Deaths and Life Expectancy, Births and Fertility, Marriages and Divorces, and more.

Publications

- Information Papers which highlight conceptual and methodological changes and improvements in official statistics.
- Occasional Papers which present statistical trends and observations on important social and economic issues to stimulate discussion and research.
- eBook of Statistics which consolidates latest information and resources on key economic and socio-demographic domains.
- Singapore in Figures which allows exploration of key economic and socio-demographic statistics through interactive dashboards.
- Statistics Singapore Newsletter which features articles on latest key statistical activities, recent survey findings and methodological improvements.

Visualisations such as infographics and interactive dashboards with latest data, and videos to explain data and statistical concepts.

Data for Businesses with data tools to empower data-driven business decisions, giving firms insights on their customers, industries and business performance.

Advance Release Calendar providing dates of upcoming data releases in the next six months.

SingStat Table Builder

Access for free over 2,000 data tables across various economic and socio-demographic domains from 70 public sector agencies. Watch the video to find out how you can easily access and customise data tables.

SingStat Mobile App

Download the free app for fast and convenient access to commonly used statistics from your mobile devices. More than 200 charts are available across 28 data categories for easy access to visualise data trends.

SingStat Express

Subscribe to receive alerts on the latest press releases, occasional/information papers and newsletters.
