## SINGAPORE MANUFACTURED PRODUCTS PRICE INDEX (2012 = 100)

#### **April 2018**

#### **Singapore Manufactured Products Price Index**

Change over previous month

The Singapore Manufactured Products Price Index fell 2.1 per cent in April 2018, in contrast to the 1.5 per cent increase in March 2018. The Oil index rose 4.5 per cent against the 0.5 per cent decrease in March 2018, due mainly to pricier diesel fuel & fuel oils and power kerosene. The Non-oil index slipped 3.4 per cent in April 2018, after rising 2.0 per cent in the previous month.

Declines in the Non-oil sub-indices were led by the Chemicals & Chemical Products (-11.6 per cent) index, due mainly to lower price of organic chemicals, and the Manufactured Goods (-0.2 per cent) index. The declines were partially offset by increases in the Machinery & Transport Equipment (1.3 per cent) index, due mainly to higher prices of integrated circuits, and the Animal & Vegetable Oils (0.4 per cent) index.

#### Change over same period of previous year

The Singapore Manufactured Products Price Index was unchanged in April 2018 over the previous year, compared to the 1.4 per cent increase in March 2018. The Oil index rose 15.0 per cent while the Non-oil index fell 2.8 per cent.

Among the Non-oil sub-indices, lower prices of Animal & Vegetable Oils (-13.2 per cent), Machinery & Transport Equipment (-5.6 per cent), Chemicals & Chemical Products (-1.3 per cent) and Food & Live Animals (-1.0 per cent) were partially moderated by higher prices of Crude Materials (6.7 per cent), Miscellaneous Manufactured Articles (2.8 per cent), Manufactured Goods (2.4 per cent) and Beverages & Tobacco (0.7 per cent).

## DOMESTIC SUPPLY PRICE INDEX (2012 = 100)

#### **April 2018**

#### **Domestic Supply Price Index**

#### Change over previous month

The Domestic Supply Price Index rose 1.5 per cent in April 2018, compared to the 0.2 per cent decline in the previous month. The Oil index went up 5.8 per cent in April 2018, attributed mainly to higher prices of crude petroleum and diesel fuel & fuel oils. It was unchanged in March 2018. The Non-oil index fell 0.2 per cent, extending the 0.3 per cent decline in the previous month.

Declines in the Non-oil sub-indices led by the Chemicals & Chemical Products (-3.4 per cent) index, due mainly to lower prices of organic chemicals, and the Manufactured Goods (-0.1 per cent) index were partially moderated by increases in the Machinery & Transport Equipment (0.8 per cent) and Miscellaneous Manufactured Articles (0.1 per cent) indices.

#### Change over same period of previous year

The Domestic Supply Price Index rose 2.5 per cent in April 2018 from a year ago, following the 1.0 per cent increase from the previous month. The Oil index rose 17.4 per cent while the Non-oil index declined 2.6 per cent.

For the Non-oil sub-indices, decreases in the Animal & Vegetable Oils (-8.9 per cent), Machinery & Transport Equipment (-4.4 per cent), Miscellaneous Manufactured Articles (-2.9 per cent), Food & Live Animals (-2.5 per cent) and Chemicals & Chemical Products (-0.5 per cent) indices were partially offset by increases in the Manufactured Goods (2.6 per cent), Crude Materials (1.9 per cent) and Beverages & Tobacco (0.6 per cent) indices.

#### TECHNICAL NOTE

The *Singapore Manufactured Products Price Index (SMPPI)* monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2011. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The *Domestic Supply Price Index (DSPI)* is designed to measure the changes in the price level of goods manufactured locally or imported which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2011.

#### **Index Formula**

The 2012-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2011 preceded the price reference period of 2012. The geometric mean (GM) formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean (AM) formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

An Information Paper on the Rebasing of Singapore Manufactured Products and Domestic Supply Price Indices (2012=100) is available on the department's website at <a href="https://www.singstat.gov.sg/ppi#Producer-and-International-Trade-Prices">https://www.singstat.gov.sg/ppi#Producer-and-International-Trade-Prices</a>.

#### **Measurement of Changes in Price Indices**

**Change over previous month** compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements. As the price indices are found not to be seasonal, it is not necessary for seasonal adjustment to be carried out.

**Change over same period of previous year** measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

#### **Dissemination of Data**

The Singapore Manufactured Products and Domestic Supply Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder).
