SINGAPORE MANUFACTURED PRODUCTS PRICE INDEX (2012 = 100)

August 2018

Singapore Manufactured Products Price Index

Change over previous month

The Singapore Manufactured Products Price Index rose 0.2 per cent in August 2018, following the 1.7 per cent increase in July 2018. The Oil index went up 1.3 per cent, extending the 1.4 per cent gain in July 2018, due mainly to higher prices of diesel fuel & fuel oil and motor spirits. The Non-oil index fell 0.1 per cent in August 2018, in contrast to the 1.8 per cent increase in the previous month.

For the Non-oil sub-indices, the decreases were led by the Chemicals & Chemical Products (-2.3 per cent) index, due mainly to lower prices of organic chemicals, and the Manufactured Goods (-0.1 per cent) index. The declines were partially moderated by increases led by the Machinery & Transport Equipment (1.3 per cent) index, due to higher prices of integrated circuits, and the Miscellaneous Manufactured Articles (0.7 per cent) index.

Change over same period of previous year

The Singapore Manufactured Products Price Index increased 9.9 per cent in August 2018 over the previous year, extending the 10.9 per cent increase in July 2018. The Oil and Non-Oil indices rose 35.2 per cent and 5.4 per cent respectively.

All Non-oil sub-indices were higher, except for the Animal & Vegetable Oils (-16.8 per cent) index. Higher prices were registered for Chemicals & Chemical Products (11.7 per cent), Crude Materials (4.8 per cent), Miscellaneous Manufactured Articles (3.5 per cent), Machinery & Transport Equipment (2.8 per cent), Manufactured Goods (2.8 per cent), Food & Live Animals (2.3 per cent) and Beverages & Tobacco (1.6 per cent).

DOMESTIC SUPPLY PRICE INDEX (2012 = 100)

August 2018

Domestic Supply Price Index

Change over previous month

The Domestic Supply Price Index rose 0.3 per cent in August 2018, following the 1.1 per cent increase in the previous month. The Oil index edged up 0.3 per cent in August 2018, continuing the 1.3 per cent increase in July 2018, due mainly to higher prices of high speed diesel fuel and diesel fuel & fuel oil. The Non-oil index rose 0.3 per cent, after increasing 1.0 per cent in the previous month.

Among the Non-oil sub-indices, increases led by the Machinery & Transport Equipment (0.7 per cent) and Miscellaneous Manufactured Articles (0.2 per cent) indices were partially offset by decreases led by the Chemicals & Chemical Products (-0.4 per cent) and Animal & Vegetable Oils (-0.4 per cent) indices.

Change over same period of previous year

The Domestic Supply Price Index rose 12.7 per cent in August 2018 over the previous year, following the 13.5 per cent increase in July 2018. The Oil and Non-Oil indices increased 42.5 per cent and 3.0 per cent respectively in August 2018.

Among the Non-oil sub-indices, higher prices of Chemicals & Chemical Products (9.5 per cent), Manufactured Goods (4.6 per cent), Machinery & Transport Equipment (1.7 per cent), Beverages & Tobacco (1.3 per cent), Crude Materials (1.1 per cent) and Food & Live Animals (0.5 per cent) were partially offset by lower prices of Animals & Vegetable Oils (-10.1 per cent) and Miscellaneous Manufactured Articles (-0.2 per cent).

Domestic Supply Price Index (2012=100) Overall Non-oil Aug Nov Feb May Aug 2017

Change over same period of previous year

TECHNICAL NOTE

The *Singapore Manufactured Products Price Index (SMPPI)* monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2011. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The *Domestic Supply Price Index (DSPI)* is designed to measure the changes in the price level of goods manufactured locally or imported which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2011.

Index Formula

The 2012-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2011 preceded the price reference period of 2012. The geometric mean (GM) formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean (AM) formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

An Information Paper on the Rebasing of Singapore Manufactured Products and Domestic Supply Price Indices (2012=100) is available on the department's website at https://www.singstat.gov.sg/ppi#Producer-and-International-Trade-Prices.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements. As the price indices are found not to be seasonal, it is not necessary for seasonal adjustment to be carried out.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Singapore Manufactured Products and Domestic Supply Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at https://www.singstat.gov.sg/publications/economy/producer-price-indices or through the QR code below:

NOTES

The Singapore Manufactured Products and Domestic Supply Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.
