### SINGAPORE MANUFACTURED PRODUCTS PRICE INDEX (2012 = 100)

#### **March 2018**

#### **Singapore Manufactured Products Price Index**

Change over previous month

The Singapore Manufactured Products Price Index rose 1.4 per cent in March 2018, following the 0.6 per cent increase in February 2018. The Oil index went down 0.5 per cent, due mainly to cheaper power kerosene and bitumen, extending the 3.0 per cent decrease in February 2018. The Non-oil index rose 1.8 per cent in March 2018, after rising 1.4 per cent in the previous month.

For the Non-oil sub-indices, increases led by the Chemicals & Chemical Products (7.0 per cent) index, due mainly to higher prices of organic chemicals, and the Crude Materials (0.1 per cent) index were partially offset by decreases in the Animal & Vegetable Oils (-1.2 per cent) and Machinery & Transport Equipment (-0.9 per cent) indices.

#### Change over same period of previous year

The Singapore Manufactured Products Price Index increased 1.3 per cent in March 2018 over the previous year, against the 0.8 per cent drop in February 2018. The Oil index rose 12.9 per cent while the Non-oil index fell 0.7 per cent.

Among the Non-oil sub-indices, lower prices of Animal & Vegetable Oils (-12.5 per cent), Machinery & Transport Equipment (-9.0 per cent) and Food & Live Animals (-1.1 per cent) were partially moderated by higher prices of Chemicals & Chemical Products (10.9 per cent), Crude Materials (6.6 per cent), Miscellaneous Manufactured Articles (3.2 per cent), Manufactured Goods (2.4 per cent) and Beverages & Tobacco (0.6 per cent).

## DOMESTIC SUPPLY PRICE INDEX (2012 = 100)

#### **March 2018**

#### **Domestic Supply Price Index**

#### Change over previous month

The Domestic Supply Price Index decreased 0.3 per cent in March 2018, after declining 1.0 per cent in the previous month. The Oil index slipped 0.3 per cent in March 2018, owing to lower prices of power kerosene and crude petroleum, following the 3.3 per cent decrease in February 2018. The Non-oil index went down 0.4 per cent, after being unchanged in the previous month.

Declines in the Non-oil sub-indices were led by the Food & Live Animals (-1.5 per cent) and Machinery & Transport Equipment (-1.2 per cent), due mainly to lower prices of vegetables and integrated circuits respectively. The increase in the Chemicals & Chemical Products (2.1 per cent) index was attributed mainly to higher prices of organic chemicals.

#### Change over same period of previous year

The Domestic Supply Price Index rose 0.9 per cent in March 2018 from a year ago, in contrast to the 0.9 per cent decrease from the previous month. The Oil index rose 13.5 per cent while the Non-oil index declined 3.3 per cent.

For the Non-oil sub-indices, decreases in the Animal & Vegetable Oils (-11.3 per cent), Machinery & Transport Equipment (-6.5 per cent), Food & Live Animals (-2.9 per cent) and Miscellaneous Manufactured Articles (-2.6 per cent) indices were partially moderated by increases in the Chemicals & Chemical Products (2.1 per cent), Manufactured Goods (1.8 per cent) and Crude Materials (1.4 per cent) indices.

#### TECHNICAL NOTE

The *Singapore Manufactured Products Price Index (SMPPI)* monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2011. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The *Domestic Supply Price Index (DSPI)* is designed to measure the changes in the price level of goods manufactured locally or imported which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2011.

#### **Index Formula**

The 2012-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2011 preceded the price reference period of 2012. The geometric mean (GM) formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean (AM) formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

An Information Paper on the Rebasing of Singapore Manufactured Products and Domestic Supply Price Indices (2012=100) is available on the department's website at http://www.singstat.gov.sg/publications/publications-and-papers/economy#prices.

#### **Measurement of Changes in Price Indices**

**Change over previous month** compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements. As the price indices are found not to be seasonal, it is not necessary for seasonal adjustment to be carried out.

**Change over same period of previous year** measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

#### **Dissemination of Data**

The Singapore Manufactured Products and Domestic Supply Price Indices are published in the Monthly Digest of Statistics.
