# Singapore Manufactured Products Price Index (2018 = 100) May 2019

#### **Month-on-Month Change**

The Singapore Manufactured Products Price Index increased 0.8% in May 2019, in contrast to the 1.5% decline in April 2019. The Oil index fell 0.9%, against the 3.5% gain in the previous month. The Non-oil index rose 1.1%, after declining 2.3% in April 2019.

All Non-oil sub-indices were higher, except for the Animal & Vegetable Oils index which fell 0.2%. The increases were led by the Machinery & Transport Equipment (1.4%) and Miscellaneous Manufactured Articles (1.0%) indices, due mainly to higher prices of integrated circuits and organic chemicals respectively.

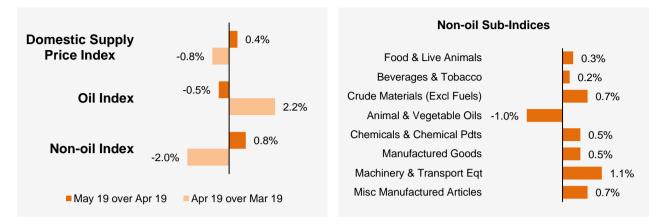

#### Year-on-Year Change

The Singapore Manufactured Products Price Index decreased 4.1% in May 2019 from a year ago, following the 1.6% decline in April 2019. The Oil and Non-oil indices fell 6.7% and 3.7% respectively.

Within the Non-oil sub-indices, decreases in the Animal & Vegetable Oils (-13.5%), Crude Materials (-6.8%), Machinery & Transport Equipment (-4.6%), Chemicals & Chemical Products (-4.3%) and Food & Live Animals (-1.2%) indices were partially moderated by increases in the Beverages & Tobacco (4.2%), Miscellaneous Manufactured Articles (1.5%) and Manufactured Goods (0.8%) indices.

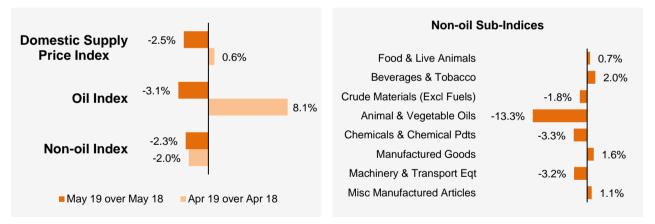

# Domestic Supply Price Index (2018 = 100) May 2019

#### Month-on-Month Change

The Domestic Supply Price Index rose 0.4% in May 2019, after decreasing 0.8% in April 2019. The Oil index fell 0.5%, in contrast to the 2.2% gain in the previous month. The Non-oil index rose 0.8% in May 2019, against the 2.0% decrease in the previous month.

For the Non-oil sub-indices, increases were led by the Machinery & Transport Equipment (1.1%) index, due mainly to higher prices of integrated circuits, and the Miscellaneous Manufactured Articles (0.7%) index. The increases were partially offset by the decrease in the Animal & Vegetable Oils (-1.0%) index, attributed mainly to lower prices of crude palm oil.

#### Year-on-Year Change

The Domestic Supply Price Index fell 2.5% in May 2019 over the previous year, after rising 0.6% in April 2019. The Oil and Non-oil indices declined 3.1% and 2.3% respectively.

For the Non-oil sub-indices, decreases in the Animal & Vegetable Oils (-13.3%), Chemicals & Chemical Products (-3.3%), Machinery & Transport Equipment (-3.2%) and Crude Materials (-1.8%) indices were partially moderated by increases in the Beverages & Tobacco (2.0%), Manufactured Goods (1.6%), Miscellaneous Manufactured Articles (1.1%) and Food & Live Animals (0.7%) indices.

# **Technical Note**

The **Singapore Manufactured Products Price Index (SMPPI)** monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2018. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The **Domestic Supply Price Index (DSPI)** is designed to measure the changes in the price level of goods manufactured locally or imported which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2018.

#### Index Formula

The 2018-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2017 preceded the price reference period of 2018. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

#### **Measurement of Changes in Price Indices**

*Change over previous month* compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

*Change over same period of previous year* measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

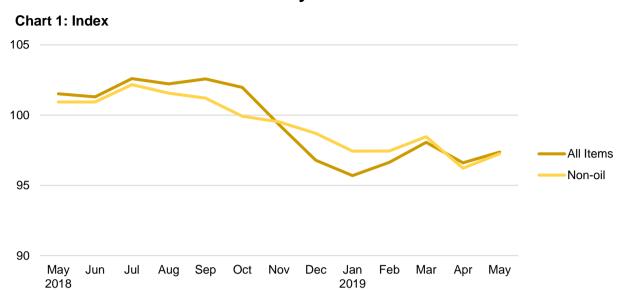

#### **Index Revision**

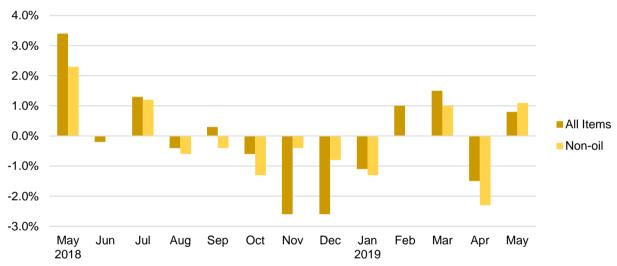

The indices may be revised when late returns and amendments received from respondents are incorporated.

#### **Dissemination of Data**

The Singapore Manufactured Products and Domestic Supply Price Indices are available on the SingStat Website (<u>www.singstat.gov.sg/tablebuilder</u>). Excel tables for this month's report are available at <u>https://www.singstat.gov.sg/publications/economy/producer-price-indices</u> or through the QR code below:

## Table 4 Domestic Supply Price Index

#### NOTATIONS

- nes not elsewhere specified
  - nil or negligible

#### NOTES

The Singapore Manufactured Products and Domestic Supply Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.
