Singapore Manufactured Products Price Index (2018 = 100) November 2020

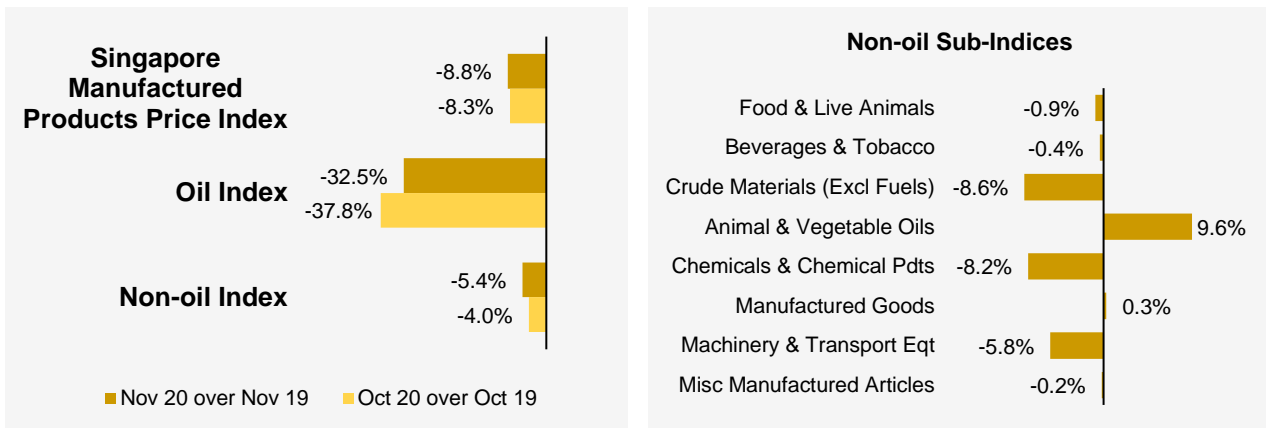

Month-on-Month Change

The Singapore Manufactured Products Price Index declined 1.6% in November 2020, in contrast to the 0.4% increase in October 2020. The Oil index rose 4.4%, after the 0.1% increase in the previous month. The Non-oil index fell 2.2%, against the 0.5% increase in October 2020.

For the Non-oil sub-indices, the decreases were led by the Machinery & Transport Equipment (-4.3%) index due mainly to lower prices of integrated circuits, and the Miscellaneous Manufactured Articles (-0.3%) index. The declines were partially moderated by increases in the Chemicals & Chemical Products (1.6%) index due mainly to higher prices of organic chemicals, and the Animal & Vegetable Oils (0.3%) index.

Year-on-Year Change

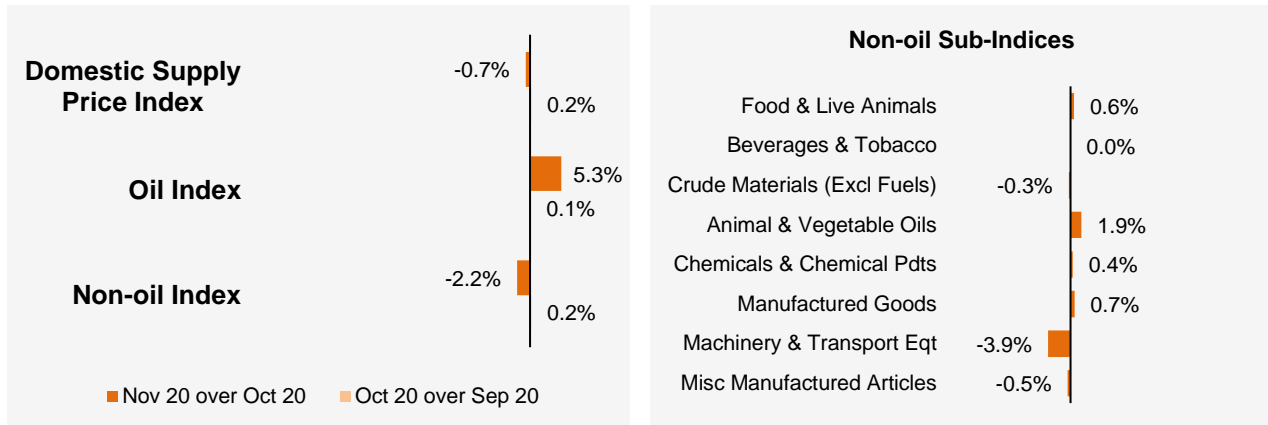

The Singapore Manufactured Products Price Index fell 8.8% in November 2020 from a year ago, following the 8.3% decrease in October 2020. The Oil and Non-oil indices fell 32.5% and 5.4% respectively.

For the Non-oil sub-indices, lower prices of Crude Materials (-8.6%), Chemicals & Chemical Products (-8.2%), Machinery & Transport Equipment (-5.8%), Food & Live Animals (-0.9%), Beverages & Tobacco (-0.4%) and Miscellaneous Manufactured Articles (-0.2%) were partially offset by higher prices of Animal & Vegetable Oils (9.6%) and Manufactured Goods (0.3%).

Domestic Supply Price Index (2018 = 100) November 2020

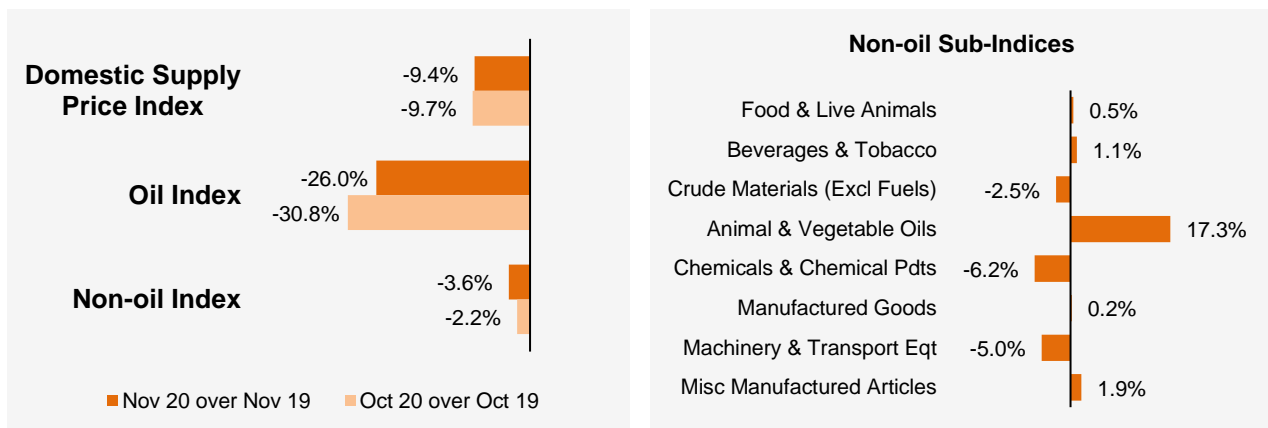

Month-on-Month Change

The Domestic Supply Price Index fell 0.7% in November 2020, in contrast to the 0.2% increase in October 2020. The Oil index increased 5.3%, following the 0.1% increase in the previous month. The Non-oil index declined 2.2%, against the 0.2% increase in October 2020.

Among the Non-oil sub-indices, the declines were led by the Machinery & Transport Equipment (-3.9%) index due mainly to lower prices of integrated circuits, and the Miscellaneous Manufactured Articles (-0.5%) index. The declines were partially moderated by increases in the Manufactured Goods (0.7%) and Chemicals & Chemical Products (0.4%) indices.

Year-on-Year Change

The Domestic Supply Price Index fell 9.4% in November 2020 from a year ago, following the 9.7% decrease in October 2020. The Oil and Non-oil indices declined 26.0% and 3.6% respectively.

For the Non-oil sub-indices, lower prices of Chemicals & Chemical Products (-6.2%), Machinery & Transport Equipment (-5.0%) and Crude Materials (-2.5%) were partially offset by higher prices of Animal & Vegetable Oils (17.3%), Miscellaneous Manufactured Articles (1.9%), Beverages & Tobacco (1.1%), Food & Live Animals (0.5%) and Manufactured Goods (0.2%).

Technical Note

The **Singapore Manufactured Products Price Index (SMPPI)** monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2018. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The **Domestic Supply Price Index (DSPI)** is designed to measure the changes in the price level of goods manufactured locally or imported which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2018.

Index Formula

The 2018-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2017 preceded the price reference period of 2018. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2012-Based Price Index Series to the New 2018-Based Price Index Series

The SMPPI and DSPI have been rebased from base year 2012 to base year 2018. To facilitate comparison of the historical price indices across base years, the old 2012-based series are linked to the new 2018-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2018-based index in 2018 to the annual 2012-based index in 2018.

Example : Linking the old Iron & Steel Index series for SMPPI prior to 2018, to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)	Linked Coefficient
2018	78.0	100.0	$100.0 \div 78.0 = 1.282$

2) Re-scaling the old series to the 2018-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)
2016	Dec	70.8	$70.8 \times 1.282 = 90.8$
2017	Jan	71.4	$71.4 \times 1.282 = 91.5$

Linking Method for Maintaining the Old Index Reference Period

To continue the old 2012-based index series going forward in time, re-scale the new 2018-based index series to the old base year 2012 level, via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2012-based index in 2018 to the annual 2018-based index in 2018.

Example : Linking the new 2018-based Iron & Steel Index series for SMPPI to the 2012-based Iron & Steel Index (2012=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)	Linked Coefficient
2018	100.0	78.0	$78.0 \div 100.0 = 0.780$

2) Re-scaling the new series to the 2012-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)
2019	Jan	105.6	$105.6 \times 0.780 = 82.4$
2019	Feb	104.7	$104.7 \times 0.780 = 81.7$

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Singapore Manufactured Products and Domestic Supply Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at <https://www.singstat.gov.sg/publications/economy/producer-price-indices> or through the QR code below:

NOTES

The Singapore Manufactured Products and Domestic Supply Price Indices report contains statistics that are the most recent available at the time of its preparation.

Some statistics, particularly those for the most recent time periods, are provisional and may be subject to revision in later issues.
