Singapore Manufactured Products Price Index (2018 = 100) October 2022

Month-on-Month Change

The Singapore Manufactured Products Price Index rose 0.2% in October 2022, as compared to September 2022 which was unchanged. The Oil index gained 0.4%, reversing the 7.0% decrease in the previous month. The Non-oil index rose 0.2% in October 2022, after the 1.4% increase in September 2022.

Among the Non-oil sub-indices, the increases were led by the Miscellaneous Manufactured Articles (0.8%) and the Machinery & Transport Equipment (0.5%) indices. The increases were partially offset by the decreases in the Crude Materials (-5.0%) index, due mainly to lower prices of synthetic rubber, and the Chemicals & Chemical Products (-0.2%) index.

Year-on-Year Change

The Singapore Manufactured Products Price Index increased 11.6% in October 2022 from a year ago, following the 13.8% gain in September 2022. The Oil and Non-oil indices went up 20.6% and 10.0% respectively.

All Non-oil sub-indices increased. Higher prices were registered for Crude Materials (19.4%), Machinery & Transport Equipment (13.1%), Food & Live Animals (11.3%), Animal & Vegetable Oils (5.7%), Chemicals & Chemical Products (5.2%), Miscellaneous Manufactured Articles (4.9%), Beverages & Tobacco (4.8%) and Manufactured Goods (3.5%).

Domestic Supply Price Index (2018 = 100) October 2022

Month-on-Month Change

The Domestic Supply Price Index fell 0.4% in October 2022, following the 1.7% decrease in September 2022. The Oil index declined 2.2%, extending the 8.2% decrease in the previous month. The Non-oil index rose 0.4% in October 2022, after the 1.5% increase in September 2022.

Among the Non-oil sub-indices, increases were led by the Machinery & Transport Equipment (0.8%) and the Miscellaneous Manufactured Articles (0.3%) indices. The increases were partially moderated by the decreases in the Crude Materials (-2.0%) index, resulting mainly from lower prices of synthetic rubber, and the Chemicals & Chemical Products (-0.4%) index.

Year-on-Year Change

The Domestic Supply Price Index rose 8.5% in October 2022 from a year ago, following the 12.8% increase in September 2022. The Oil and Non-oil indices gained 4.3% and 10.4% respectively.

For the Non-oil sub-indices, higher prices of Machinery & Transport Equipment (13.8%), Crude Materials (12.6%), Beverages & Tobacco (12.0%), Food & Live Animals (9.9%), Chemicals & Chemical Products (5.7%), Miscellaneous Manufactured Articles (4.6%) and Manufactured Goods (3.7%) were partially offset by lower prices of Animal & Vegetable Oils (-0.3%).

Technical Note

The **Singapore Manufactured Products Price Index (SMPPI)** monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2018. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The **Domestic Supply Price Index (DSPI)** is designed to measure the changes in the price level of goods manufactured locally or imported which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2018.

Index Formula

The 2018-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2017 preceded the price reference period of 2018. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2012-Based Price Index Series to the New 2018-Based Price Index Series

The SMPPI and DSPI have been rebased from base year 2012 to base year 2018. To facilitate comparison of the historical price indices across base years, the old 2012-based series are linked to the new 2018-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2018-based index in 2018 to the annual 2012-based index in 2018.

Example: Linking the old Iron & Steel Index series for SMPPI prior to 2018, to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)	Linked Coefficient
2018	78.0	100.0	$100.0 \div 78.0 = 1.282$

2) Re-scaling the old series to the 2018-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2012=100)	Iron & Steel Index (2018=100)
2016	Dec	70.8	$70.8 \times 1.282 = 90.8$
2017	Jan	71.4	$71.4 \times 1.282 = 91.5$

Linking Method for Maintaining the Old Index Reference Period

To continue the old 2012-based index series going forward in time, re-scale the new 2018-based index series to the old base year 2012 level, via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2012-based index in 2018 to the annual 2018-based index in 2018.

Example: Linking the new 2018-based Iron & Steel Index series for SMPPI to the 2012-based Iron & Steel Index (2012=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)	Linked Coefficient
2018	100.0	78.0	$78.0 \div 100.0 = 0.780$

2) Re-scaling the new series to the 2012-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2012=100)
2019	Jan	105.6	$105.6 \times 0.780 = 82.4$
2019	Feb	104.7	$104.7 \times 0.780 = 81.7$

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Singapore Manufactured Products and Domestic Supply Price Indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this month's report are available at <https://www.singstat.gov.sg/publications/economy/producer-price-indices> or through the QR code below:
