SERVICES PRODUCER PRICE INDICES SECOND QUARTER 2021

The Department of Statistics (DOS) compiles a suite of Services Producer Price Indices (SPPIs) to measure the changes in the average prices of services produced by establishments, for selected industries of the Singapore economy. These are prices that reflect the amount received by a producer exclusive of any taxes. The SPPIs facilitate the analysis of macro-economic conditions and in monitoring price movements of the services sector. More importantly, the SPPIs are used mainly as price deflators in the national accounts to estimate the real growth of the services sector in Singapore.

OVERVIEW OF PRICE INDICES CHANGES

PRICE INDEX CHANGES BY INDUSTRY

SEA FREIGHT TRANSPORT PRICE INDEX (SFTPI)

The SFTPI measures changes in the prices of transporting seaborne freight by Singapore-registered ship operators.

SFTPI (2017=100) for 2Q2021 : **145.5**

Quarter-on-Quarter Change for 2Q2021 over 1Q2021 : **+11.1%**

Year-on-Year Change for 2Q2021 over 2Q2020 : **+23.5%**

The SFTPI rose 11.1 per cent in 2Q2021, extending the 9.7 per cent increase in 1Q2021, due mainly to higher dry bulk freight rates.

On a year-on-year comparison, the SFTPI increased 23.5 per cent in 2Q2021, led by higher containerised and dry bulk freight rates.

WAREHOUSING AND STORAGE PRICE INDEX (WSPI)

The WSPI measures changes in the prices of services produced by Singapore-registered warehousing and storage establishments.

WSPI (2016=100) for 2Q2021 : **105.5**

Quarter-on-Quarter Change for 2Q2021 over 1Q2021 : **+0.3%**

Year-on-Year Change for 2Q2021 over 2Q2020 : **+3.1%**

The WSPI gained 0.3 per cent in 2Q2021 over the previous quarter, after increasing 2.5 per cent in 1Q2021, due primarily to higher charges of class cargo storage.

Likewise, the WSPI rose 3.1 per cent in 2Q2021 on a year-on-year comparison, on account of higher charges of class cargo storage.

SERVICES PRODUCER PRICE INDICES, SECOND QUARTER 2021

CARGO HANDLING PRICE INDEX (CHPI)

The CHPI measures changes in the prices of services provided by Singapore-registered cargo handling establishments.

CHPI (2016=100) for 2Q2021 : 100.3

Quarter-on-Quarter Change for 2Q2021 over 1Q2021 : -1.0%

Year-on-Year Change for 2Q2021 over 2Q2020 : +1.2%

The CHPI fell 1.0 per cent in 2Q2021, after having been unchanged in 1Q2021, resulting from lower crane services rates.

Conversely, the CHPI rose 1.2 per cent in 2Q2021 from a year ago, due primarily to higher crane services rates.

FREIGHT FORWARDING PRICE INDEX (FFPI)

The FFPI measures changes in the prices for freight transport arrangement on behalf of a shipper, via air, sea and land transportation modes by Singapore-registered freight forwarding companies and non-vessel operating common carriers.

FFPI (2017=100) for 2Q2021 : 128.7

Quarter-on-Quarter Change for 2Q2021 over 1Q2021 : -0.1%

Year-on-Year Change for 2Q2021 over 2Q2020 : -2.0%

The FFPI fell 0.1 per cent in 2Q2021 over the previous quarter, reversing the 1.4 per cent increase in 1Q2021, stemming from lower air freight forwarding charges which more than offset the higher sea freight forwarding charges.

Similarly, the FFPI declined 2.0 per cent in 2Q2021 on a year-on-year comparison, mainly because of lower air freight forwarding charges.

SERVICES PRODUCER PRICE INDICES, SECOND QUARTER 2021

TELECOMMUNICATION SERVICES PRICE INDEX (TSPI)

The TSPI measures changes in the prices of telecommunication services produced by Singapore-registered telecommunication services providers.

TSPI (2017=100) for 2Q2021 : 99.1

Quarter-on-Quarter Change for 2Q2021 over 1Q2021 : -0.2%

Year-on-Year Change for 2Q2021 over 2Q2020 : -1.6%

The TSPI fell 0.2 per cent in 2Q2021 over the previous quarter, reversing the 0.4 per cent gain in 1Q2021, due to lower charges of wired and internet access services.

Likewise, the TSPI declined 1.6 per cent in 2Q2021 on a year-on-year basis, led by lower charges of wired and wireless services.

COMPUTER CONSULTANCY AND INFORMATION SERVICES PRICE INDEX (CISPI)

The CISPI measures the changes in the prices of services produced by Singapore-registered information technology services providers.

CISPI (2016=100) for 2Q2021 : 103.8

Quarter-on-Quarter Change for 2Q2021 over 1Q2021 : +0.1%

Year-on-Year Change for 2Q2021 over 2Q2020 : 0.0%

The CISPI inched up 0.1 per cent in 2Q2021 over the last quarter, reversing the 0.1 per cent decline in 1Q2021, driven mainly by higher charges of data analytics processing, hosting and related activities.

The CISPI was unchanged in 2Q2021 on a year-on-year comparison, as the higher charges of computer programming, consultancy and related activities were offset by lower fees of data analytics processing, hosting and related activities.

SERVICES PRODUCER PRICE INDICES, SECOND QUARTER 2021

ACCOUNTING SERVICES PRICE INDEX (ASPI)

The ASPI measures changes in the prices of accounting and auditing services provided by Singapore-registered accounting establishments.

ASPI (2017=100) for 2Q2021 : **110.5**

Quarter-on-Quarter Change for 2Q2021 over 1Q2021 : **0.0%**

Year-on-Year Change for 2Q2021 over 2Q2020 : **+1.2%**

The ASPI was unchanged in 2Q2021 over the previous quarter, after declining 0.6 per cent in 1Q2021, as the lower charges of tax advisory & compliance services were offset by higher charges of audit & assurance, business advisory and book-keeping services.

On a year-on-year comparison, the ASPI rose 1.2 per cent in 2Q2021, led by higher rates of audit & assurance, business advisory and book-keeping services.

Notes:

Q-o-Q(%) refers to Percentage change of a quarter index over the previous quarter.

Y-o-Y(%) refers to Percentage change of a quarter index over the same quarter in the previous year.

Base Year refers to the Price reference period and Index reference period of the index.

¹SSIC 2020 – Singapore Standard Industrial Classification 2020, Department of Statistics.

EXPLANATORY NOTES

The Services Producer Price Indices (SPPIs) cover key priority services sectors that require price deflators to obtain more precise and reliable measurement of real national account estimates.

The SPPIs are compiled from prices collected from routine statutory price surveys conducted by DOS under the Statistics Act (Chapter 317), or from online or administrative sources. The selection of companies for the price survey of an industry is generally based on judgemental and stratified sampling methods. A representative sample of service products that can be priced over time, is selected from each company.

The SPPIs are aligned to the Singapore Standard Industrial Classification. They are calculated using the modified Laspeyres price index formula with fixed base weights¹, where the weights reference period precedes the price reference period. The price indices at the higher level are aggregated from the lower level price indices together with their corresponding weights using weighted arithmetic means. Non-responses are imputed for, in accordance with IMF guidelines² and aligned with the best practices of other National Statistical Offices overseas.

The SPPIs are rebased every five years to ensure they remain relevant to the selected industries. During the rebasing exercise, the basket of services and the weights structure of the SPPI are updated to correspond to the prevailing production patterns of the industry. The weights are mainly obtained from surveys conducted by DOS and supplemented by administrative data. The frequency of rebasing may be shorter for service industries that are more dynamic.

The SPPIs are published quarterly. The quarters are defined as 1Q-(Jan to Mar), 2Q-(Apr to Jun), 3Q-(Jul to Sep) and 4Q-(Oct to Dec). The quarter-on-quarter change (Q-o-Q) refers to the percentage change of the reference quarter over the previous quarter e.g. 2Q2020/1Q2020. The year-on-year change (Y-o-Y) refers to the percentage change of the reference quarter over the same quarter in the previous year e.g. 2Q2020/2Q2019.

The published SPPIs are not seasonally adjusted. The published indices for previous reference quarters may be revised when late returns and amendments received from survey respondents are incorporated at a later date.

¹ Modified Laspeyres Price Index Formula

$$PLas(m) = \sum w^b \left(\frac{p^t}{p^0} \right)$$

p^t = prices of period t , p^0 = prices in the price reference period 0 ;
 w^b = weights shares in weights reference period b

² Producer Price Index Manual : Theory and Practice : International Monetary Fund, 2004

DISSEMINATION OF DATA

This Services Producer Price Indices report is published on the 25th day of the 3rd month after the reference quarter, or the next working day if it falls on a Saturday, Sunday or Public Holiday. The indices are available on the SingStat Website (www.singstat.gov.sg/tablebuilder). Excel tables for this quarter's report are available at www.singstat.gov.sg/publications/economy/services-producer-price-indices or through the QR code below:
