SERVICES PRODUCER PRICE INDICES THIRD QUARTER 2020

The Department of Statistics (DOS) compiles a suite of Services Producer Price Indices (SPPIs) to measure the changes in the average prices of services produced by establishments, for selected industries of the Singapore economy. These are prices that reflect the amount received by a producer exclusive of any taxes. The SPPIs facilitate the analysis of macro-economic conditions and in monitoring price movements of the services sector. More importantly, the SPPIs are used mainly as price deflators in the national accounts to estimate the real growth of the services sector in Singapore.

OVERVIEW OF PRICE INDICES CHANGES

SERVICES PRODUCER PRICE INDICES, THIRD QUARTER 2020

PRICE INDEX CHANGES BY INDUSTRY

SEA FREIGHT TRANSPORT PRICE INDEX (SFTPI)

The SFTPI measures changes in the prices of transporting seaborne freight by Singapore-registered ship operators.

SFTPI (2017=100) for 3Q2020 : **114.5**

Quarter-on-Quarter Change for 3Q2020 over 2Q2020 : **-2.9%**

Year-on-Year Change for 3Q2020 over 3Q2019 : **+3.9%**

The SFTPI fell 2.9 per cent in 3Q2020 compared to last quarter, following the 5.5 per cent decline in 2Q2020, led by declines in the freight charges for crude oil and bulk liquid.

In contrast, the SFTPI rose 3.9 per cent in 3Q2020 on a year-on-year basis, attributed mainly to the higher bulk liquid and container freight rates.

WAREHOUSING AND STORAGE PRICE INDEX (WSPI)

The WSPI measures changes in the prices of services produced by Singapore-registered warehousing and storage establishments.

WSPI (2016=100) for 3Q2020 : **102.6**

Quarter-on-Quarter Change for 3Q2020 over 2Q2020 : **+0.3%**

Year-on-Year Change for 3Q2020 over 3Q2019 : **+3.4%**

The WSPI inched up 0.3 per cent in 3Q2020 over the previous quarter, extending the 0.9 per cent gain from last quarter, due mainly to higher class cargo storage charges.

Similarly, the WSPI increased 3.4 per cent in 3Q2020 on a year-on-year comparison, led by higher class cargo storage charges.

SERVICES PRODUCER PRICE INDICES, THIRD QUARTER 2020

CARGO HANDLING PRICE INDEX (CHPI)

The CHPI measures changes in the prices of services provided by Singapore-registered cargo handling establishments.

CHPI (2016=100) for 3Q2020 : 98.7

Quarter-on-Quarter Change for 3Q2020 over 2Q2020 : -0.4%

Year-on-Year Change for 3Q2020 over 3Q2019 : +3.8%

The CHPI dropped 0.4 per cent in 3Q2020 over the last quarter, reversing the 0.1 per cent increase in 2Q2020, as a result of declines in cargo surveys, container and crane services rates.

On the contrary, the CHPI rose 3.8 per cent in 3Q2020 on a year-on-year basis, arising mainly from higher charges for crane services.

FREIGHT FORWARDING PRICE INDEX (FFPI)

The FFPI measures changes in the prices for freight transport arrangement on behalf of a shipper, via air, sea and land transportation modes by Singapore-registered freight forwarding companies and non-vessel operating common carriers.

FFPI (2017=100) for 3Q2020 : 128.5

Quarter-on-Quarter Change for 3Q2020 over 2Q2020 : -2.2%

Year-on-Year Change for 3Q2020 over 3Q2019 : +22.3%

The FFPI fell 2.2 per cent in 3Q2020 over the previous quarter, in contrast to the 24.5 per cent increase in the last quarter, driven mainly by lower sea freight forwarding charges.

The FFPI rose 22.3 per cent in 3Q2020 on a year-on-year basis, due largely to higher air freight forwarding charges amid the COVID-19 pandemic.

SERVICES PRODUCER PRICE INDICES, THIRD QUARTER 2020

TELECOMMUNICATIONS SERVICES PRICE INDEX (TSPI)

The TSPI measures changes in the prices of telecommunications services produced by Singapore-registered telecommunications services providers.

TSPI (2017=100) for 3Q2020 : 102.7

Quarter-on-Quarter Change for 3Q2020 over 2Q2020 : +2.0%

Year-on-Year Change for 3Q2020 over 3Q2019 : +5.9%

The TSPI rose 2.0 per cent in 3Q2020 over the previous quarter, extending the 3.6 per cent gain in the 2Q2020, as a result of higher rates for wireless services and internet access.

Similarly, the TSPI increased 5.9 per cent in 3Q2020 on a year-on-year basis, due mainly to higher charges for wireless services.

COMPUTER CONSULTANCY AND INFORMATION SERVICES PRICE INDEX (CISPI)

The CISPI measures the changes in the prices of services produced by Singapore-registered information technology services providers.

CISPI (2016=100) for 3Q2020 : 103.5

Quarter-on-Quarter Change for 3Q2020 over 2Q2020 : -0.3%

Year-on-Year Change for 3Q2020 over 3Q2019 : +0.3%

The CISPI fell 0.3 per cent in 3Q2020 over the last quarter, after the 0.3 per cent increase in 2Q2020, led by lower maintenance and support services fees and lower rates for data and web hosting services.

Conversely, the CISPI gained 0.3 per cent in 3Q2020 on a year-on-year basis, attributed mainly to higher charges for computer programming and consultancy.

SERVICES PRODUCER PRICE INDICES, THIRD QUARTER 2020

ACCOUNTING SERVICES PRICE INDEX (ASPI)

The ASPI measures changes in the prices of accounting and auditing services provided by Singapore-registered accounting establishments.

ASPI (2017=100) for 3Q2020 : **110.3**

Quarter-on-Quarter Change for 3Q2020 over 2Q2020 : **+0.9%**

Year-on-Year Change for 3Q2020 over 3Q2019 : **+1.7%**

The ASPI rose 0.9 per cent in 3Q2020 over the previous quarter, in contrast to the 0.2 per cent decline last quarter, led by higher rates in tax advisory & compliance, business advisory and audit & assurance services.

Similarly, the ASPI increased 1.7 per cent in 3Q2020 on a year-on-year comparison, owing to higher rates for tax advisory & compliance and audit & assurance services.

		Y-o-Y(%)	-	-	2.1	4.7	3.9	8.6	4.9	2.8	3.7	2.6	0.9	1.9	1.7

Notes:

Q-o-Q(%) refers to Percentage change of a quarter index over the previous quarter.

Y-o-Y(%) refers to Percentage change of a quarter index over the same quarter in the previous year.

Base Year refers to the Price reference period and Index reference period of the index.

EXPLANATORY NOTES

The Services Producer Price Indices (SPPIs) cover key priority services sectors that require price deflators to obtain more precise and reliable measurement of real national account estimates.

The SPPIs are compiled from prices collected from routine statutory price surveys conducted by DOS under the Statistics Act (Chapter 317), or from online or administrative sources. The selection of companies for the price survey of an industry is generally based on judgemental and stratified sampling methods. A representative sample of service products that can be priced over time, is selected from each company.

The SPPIs are aligned to the Singapore Standard Industrial Classification. They are calculated using the modified Laspeyres price index formula with fixed base weights¹, where the weights reference period precedes the price reference period. The price indices at the higher level are aggregated from the lower level price indices together with their corresponding weights using weighted arithmetic means. Non-responses are imputed for, in accordance with IMF guidelines² and aligned with the best practices of other National Statistical Offices overseas.

The SPPIs are rebased every five years to ensure they remain relevant to the selected industries. During the rebasing exercise, the basket of services and the weights structure of the SPPI are updated to correspond to the prevailing production patterns of the industry. The weights are mainly obtained from surveys conducted by DOS and supplemented by administrative data. The frequency of rebasing may be shorter for service industries that are more dynamic.

The SPPIs are published quarterly. The quarters are defined as 1Q-(Jan to Mar), 2Q-(Apr to Jun), 3Q-(Jul to Sep) and 4Q-(Oct to Dec). The quarter-on-quarter change (Q-o-Q) refers to the percentage change of the reference quarter over the previous quarter e.g. 2Q2020/1Q2020. The year-on-year change (Y-o-Y) refers to the percentage change of the reference quarter over the same quarter in the previous year e.g. 2Q2020/2Q2019.

The published SPPIs are not seasonally adjusted. The published indices for previous reference quarters may be revised when late returns and amendments received from survey respondents are incorporated at a later date.

¹ Modified Laspeyres Price Index Formula

$$PLas(m) = \sum w^b \left(\frac{p^t}{p^0} \right)$$

p^t = prices of period t , p^0 = prices in the price reference period 0 ;
 w^b = weights shares in weights reference period b
