

# Life EXPECTANCY at Birth

**Singapore Residents Can Expect to Live about 2 years Longer Compared with a Decade Ago**

**Females Have Higher Life Expectancy**

*Data pertain to the life expectancy at birth of the resident population (i.e. Singapore citizens and permanent residents). Data for 2019 are preliminary.*

Life expectancy at birth is defined as the average number of years a new-born baby might expect to live, if he or she were to experience the age-specific mortality rates of the reference period throughout his or her life.
