Import Price Index (2023 = 100) May 2026

Month-on-Month Change

The Import Price Index fell 1.6% in May 2026, in contrast to the 0.2% increase in April 2026. The Oil index dropped 6.7%, extending the 1.2% decrease in the previous month, due to lower prices of petroleum and products. The Non-oil index rose 0.7% in May 2026, following the 0.8% increase in April 2026.

The increase in the Non-oil index was due to the Machinery & Transport Equipment, Chemicals & Chemical Products, Manufactured Goods, Animal & Vegetable Oils, Crude Materials and Beverages & Tobacco indices. The gains were partially offset by the decrease in the Food & Live Animals index.

Year-on-Year Change

The Import Price Index rose 19.1% in May 2026 from a year ago, extending the 18.9% gain in April 2026. The Oil and Non-oil indices gained 76.9% and 4.6% respectively.

Among the Non-oil sub-indices, the increase was due to the Machinery & Transport Equipment index, attributed to higher prices of electrical machinery apparatus, as well as the Miscellaneous Manufactured Articles, Manufactured Goods, Chemicals & Chemical Products, Crude Materials, Animal & Vegetable Oils and Beverages & Tobacco indices. The increases were partially moderated by the decline in the Food & Live Animals index.

Export Price Index (2023 = 100) May 2026

Month-on-Month Change

The Export Price Index fell 0.8% in May 2026, reversing the 3.0% increase in April 2026. The Oil index dropped 5.8%, in contrast to the 7.4% gain in the previous month, due to lower prices of petroleum and products. The Non-oil index rose 1.0% in May 2026, continuing the 1.5% increase in April 2026.

The increase in the Non-oil index was due to the Machinery & Transport Equipment index, attributed to higher prices of electrical machinery apparatus, as well as the Chemicals & Chemical Products, Crude Materials, Manufactured Goods and Beverages & Tobacco indices. The gains were partially offset by decreases in the Miscellaneous Manufactured Articles, Food & Live Animals and Animals & Vegetable Oils indices.

Year-on-Year Change

The Export Price Index rose 14.7% in May 2026 from a year ago, following the 13.3% increase in April 2026. The Oil and Non-oil indices increased 62.2% and 4.7% respectively.

Among the Non-oil sub-indices, the increase was due to the Machinery & Transport Equipment index, stemming from higher prices of electrical machinery apparatus, as well as the Chemicals & Chemical Products, Miscellaneous Manufactured Articles, Manufactured Goods and Crude Materials indices. The increases were partially moderated by declines in the Food & Live Animals, Beverages & Tobacco and Animal & Vegetable Oils indices.

Technical Note

The **Import Price Index (IPI)** is used primarily as an indicator to track the price trends of imported goods into Singapore. Prices of imports, valued at CIF terms (cost, insurance and freight) are obtained monthly from major importers. The weighting pattern of the index is derived from import statistics for 2023.

The **Export Price Index (EPI)** measures changes in the price of all exports of merchandise from Singapore, including re-exports. In general, prices are obtained from major exporters of the selected commodities. Prices used in the index computation, are the prices of goods that physically leave Singapore's main ports of export; also termed as Free on Board (FOB) prices. The weights of the index are derived from the distribution of export by commodity in 2023.

The IPI and EPI have consistently recorded response rates of about 80% respectively for each reference month, based on total import and export values of all selected commodities where price data could be collected from surveys and administrative sources.

Index Formula

The 2023-based series is compiled using the Laspeyres formula where the price and weight reference periods are aligned to the year 2023. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2018-Based Price Index Series to the New 2023-Based Price Index Series

The IPI and EPI have been rebased from base year 2018 to base year 2023. To facilitate comparison of the historical price indices across base years, the old 2018-based series are linked to the new 2023-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2018-based index in 2023.

Example: Linking the old Iron & Steel Index series for IPI prior to 2023, to the 2023-based Iron & Steel Index (2023=100)

1) Calculate the linked coefficient

| Year | Iron & Steel Index (2018=100) | Iron & Steel Index (2023=100) | Linked Coefficient |
|------|-------------------------------|-------------------------------|----------------------------|
| 2023 | 117.2 | 100.0 | $100.0 \div 117.2 = 0.853$ |

2) Re-scaling the old series to the 2023-based series using the Linked Coefficient

| Year | Month | Iron & Steel Index (2018=100) | Iron & Steel Index (2023=100) |
|------|-------|-------------------------------|-------------------------------|
| 2021 | Dec | 130.3 | $130.3 \times 0.853 = 111.1$ |
| 2022 | Jan | 128.7 | $128.7 \times 0.853 = 109.8$ |

Rescaling the 2023-Based Index Series to Previous Years

To continue the old index series going forward in time, re-scale the new 2023-based index series to the old base year level, via a Rescaling Coefficient. The Rescaling Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2023-based index in the old base year.

Example: Rescaling the new 2023-based Iron & Steel Index series for IPI to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the rescaling coefficient

| Base Year | Annual Iron & Steel Index in 2023 | Annual Iron & Steel Index in 2018 | Linked Coefficient |
|-----------|-----------------------------------|-----------------------------------|---------------------------|
| 2023 | 100.0 | 85.3 | $100.0 \div 85.3 = 1.172$ |

2) Re-scaling the new series to the 2018-based series using the Rescaling Coefficient

| Year | Month | Iron & Steel Index (2023=100) | Iron & Steel Index (2018=100) |
|------|-------|-------------------------------|-------------------------------|
| 2024 | Jan | 95.6 | $95.6 \times 1.172 = 112.0$ |
| 2024 | Feb | 95.3 | $95.3 \times 1.172 = 111.7$ |

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Import and Export Price Indices are available on the SingStat Website (<https://tablebuilder.singstat.gov.sg/>).

For more information about the indices, please refer to the [Catalogue of Products](#) in Page 12.

SINGAPORE DEPARTMENT OF STATISTICS COMMUNICATIONS & INFORMATION SERVICES

The Singapore Department of Statistics (DOS) offers official statistics, data insights, visualisations, and statistical resources through user-friendly platforms.

SingStat Website

Visit this convenient gateway to access latest data and statistical information.

Data across the six major themes of Economy & Prices, Industry, Trade & Investment, Population, Households, and Society covering some 200 topics such as Gross Domestic Product, Consumer Price Index, Retail Sales and Food & Beverage Services Indices, Producer Price Indices, Business Expectations, Business Receipts Index, Trade in Services, Direct Investment, Population Indicators, Household Income, Household Expenditure, Deaths and Life Expectancy, Births and Fertility, Marriages and Divorces, and more.

Publications

- **Statistics Singapore Newsletter** - features articles on latest key statistical activities, recent survey findings, and methodological improvements.
- **Information Papers** - highlight conceptual and methodological changes and improvements in official statistics.
- **Occasional Papers** - present statistical trends and observations on important social and economic issues to stimulate discussion and research.
- **Singapore in Figures** - allows exploration of key economic and socio-demographic statistics through interactive dashboards.

Visualisations such as infographics and interactive dashboards with latest data, and videos to explain data and statistical concepts.

Businesses Insights Tool for Enterprises (BITE) serves businesses with bite-sized data for big decisions, giving firms insights on their customers, industries, and business performance.

Advance Release Calendar with dates of upcoming data and publication releases in the next twelve months.

SingStat Table Builder

Access some 2,400 data tables for free across various economic and socio-demographic domains from 70 public sector agencies. Watch the [video](#) to find out how you can easily access and customise data tables.

SANDRA (Statistics AND Data Retrieval A.I. Assistant)

Chat with SANDRA on your data enquiries. Watch the [video](#) to find out how SANDRA can assist you in finding the data you need.

SingStat Express

Subscribe to receive alerts on the latest press releases, occasional/ information papers, and newsletters.

SingStat Mobile App

Download the app for fast and convenient access to commonly used statistics from your mobile devices.

Over 300 charts are available across over 40 data categories for easy access to visualise data trends.

For statistical enquiries, you may reach us at:

✉ email: info@singstat.gov.sg or submit the [Data Request Form](#)

☎ phone: 1800-323 8118* (Local users) or (65) 6332 7738 (Overseas users)

* Calls from mobile telephone lines to 1800 local toll-free number may be subject to mobile airtime charges as imposed by the relevant mobile service provider.
