

PRESS RELEASE

Retail Sales Index and Food & Beverage Services Index April 2026

Retail Trade and Food & Beverage (F&B) services are integral to Singapore's domestic consumption, catering to consumers' daily needs and enjoyment. Retailers sell merchandise directly to consumers while F&B operators provide prepared food and drinks for consumption on-premises or take-away. The Retail Sales Index (RSI) and Food & Beverage Services Index (FSI) measure the performance of the Retail Trade and F&B services industries in Singapore respectively, based on the monthly sales of businesses (which include online sales) in these industries. The key indicators also include a snapshot of the proportion of sales conducted online.

EXPLANATORY NOTES

Introduction

The Retail Sales Index (RSI) and Food & Beverage Services Index (FSI) measure the monthly sales performance of the Retail Trade and Food & Beverage (F&B) services industries based on the sales records of Retail Trade and F&B services establishments¹ respectively. Sales figure refers to the value of retail goods or food & beverages sold to consumers during the month, excluding taxes on products such as Goods and Services Tax (GST), Additional Registration Fee (ARF) and Certificates of Entitlement (COE).

The RSI and FSI are available at current prices and in volume terms. The indices at current prices measure the changes of sales values which can result from changes in both price and quantity, while the indices in volume terms measure the changes in the volume of economic activity by removing the price effect.

Data Collection

Data used to compile the RSI and FSI are obtained primarily from the monthly surveys of retail trade and F&B services establishments. Retail trade establishments sell merchandise directly to the consumers, while F&B services establishments sell prepared food and drinks for consumption on premises or on a take-away basis.

The Monthly Retail Sales Survey (RSS) and Food & Beverage Services Survey (FSS) surveyed approximately 460 retail trade and 270 F&B services enterprises respectively. Firms that responded in each reference month accounted for about 80% of the sales revenue among all firms selected for the RSS and FSS.

Index Compilation

To derive the RSI and FSI at detailed industry level, the monthly sales for that industry is divided by the average monthly sales for the same industry in the reference year.

The overall RSI and FSI are then computed by combining the sales indices of the detailed industries, using weights which measure each industry's relative importance in the overall Retail Trade and F&B services industries respectively.

To derive the indices in chained volume terms, the sales indices at current prices at detailed industry level are first deflated by the appropriate price indices. These component indices are then weighted using previous years' weights to derive the overall indices in chained volume terms. The reference year of the indices is 2025.

Online Retail and Food & Beverage Sales Proportions

The Retail Trade statistics cover:

- (a) (multi-channel) retailers in Singapore that sell via both physical stores and online/e-commerce sites;
- (b) retailers in Singapore that sell via physical stores only; and
- (c) retailers in Singapore that sell mainly via online/e-commerce sites.

The F&B services statistics cover all sales transactions of F&B establishments regardless of mode (including those transacted via food delivery platforms).

The proportion of online retail and F&B sales² out of the respective industry's total retail and F&B sales is estimated for the overall Retail Trade sector, selected retail industries and the overall F&B services sector.

Seasonal Adjustment

Seasonal effects are observed in both the RSI and FSI as there are usually intra-year periodic variations that repeat during the fixed period of time every year. To better reflect the underlying trend of the monthly sales, both indices are seasonally adjusted to remove the seasonal effects.

¹ Individual stalls in hawker centres, food courts, coffee shops or canteens are not covered.

² Online retail and F&B sales refer to the sales of goods where the order is received remotely and the price and terms of sale are agreed upon via online means, e.g. through company's website, third-party websites (e.g., online marketplaces, food delivery platforms), or mobile applications, regardless of how or where the goods are delivered or collected. This excludes orders made via telephone calls, facsimile, in-premise orders via kiosks or QR codes, and manually typed emails or messages. Payment may or may not be made online.
