Singapore Manufactured Products Price Index (2023=100) July 2026

Month-on-Month

The Singapore Manufactured Products Price Index rose 2.5% in July 2026, following declines of 0.2% and 0.7% in May and June 2026 respectively. The Oil index rebounded 4.3%, after declining in the previous two months. The Non-oil index rose 2.2% in July 2026, extending the increases seen in recent months.

Year-on-Year

The Singapore Manufactured Products Price Index rose 35.5% in July 2026 from a year ago, extending its upward trend and picking up from the 31.1% increase in June 2026. The Oil index increased 39.6% in July 2026, continuing the 36.4% increase in June 2026. The Non-oil index rose 34.8% in July 2026, extending its upward trend, compared with the 30.3% increase in the previous month.

The month-on-month and year-on-year increases in the Oil index were mainly driven by higher prices of petroleum and petroleum products, against the backdrop of the Middle East conflict¹.

¹ Oil prices soar over 6% after Trump says US ceasefire with Iran is 'over'. (2026, July 8). The StraitsTimes.
<https://www.straitstimes.com/business/companies-markets/oil-prices-surge-as-us-strikes-targets-in-iran-following-ship-attacks>

Percentage Change in Non-Oil Sub-Indices

Month-on-Month Change

Compared with June 2026, the month-on-month increase in the Non-Oil index was less broad-based in July, with fewer than half of its sub-indices recording increases. Among the Non-oil sub-indices, the Machinery & Transport Equipment index contributed the most to the increase in the Non-oil index, increasing 4.3% month-on-month due to higher prices of electrical machinery apparatus such as electronic integrated circuits. This increase was partially offset by the 4.8% decline in the Chemicals & Chemical Products index, driven by lower prices for organic chemicals.

Year-on-Year Change

Most of the Non-oil sub-indices rose year-on-year in July 2026. The increase was led by the Machinery & Transport Equipment index, which gained 48.0% on a year-on-year basis, extending its upward trend with the pace of increase strengthening in recent months. The increase was mainly due to higher prices of electrical machinery apparatus such as electronic integrated circuits.

Domestic Supply Price Index (2023=100) July 2026

Month-on-Month

The Domestic Supply Price Index rose 2.3% in July 2026, in contrast to the 2.0% and 3.0% declines in May and June 2026 respectively. The Oil index increased 2.9%, rebounding after declines in the previous three months. The Non-oil index rose 2.1% in July 2026, extending the increases seen in recent months.

Year-on-Year

The Domestic Supply Price Index rose 33.4% in July 2026 from a year ago, extending the increases seen in recent months. The Oil index continued to rise, increasing 46.4% in July 2026, continuing the 44.3% increase in June 2026. The Non-oil index maintained its upward momentum, rising 29.3% in July 2026, up from a 25.2% increase in June 2026.

The month-on-month and year-on-year increases in the Oil index were mainly led by higher prices of petroleum and petroleum products, against the backdrop of the Middle East conflict¹.

¹Oil prices soar over 6% after Trump says US ceasefire with Iran is 'over'. (2026, July 8). The StraitsTimes.
<https://www.straitstimes.com/business/companies-markets/oil-prices-surge-as-us-strikes-targets-in-iran-following-ship-attacks>

Percentage Change in Non-Oil Sub-Indices

Month-on-Month Change

The Non-oil index rose in July 2026, despite declines in most Non-oil sub-indices and one unchanged from the previous month. The increase was driven by the 4.0% increase in the Machinery & Transport Equipment index, due to higher prices of electrical machinery apparatus such as electronic integrated circuits. The increase was partially offset by the 3.0% decline in the Chemicals & Chemical Products index, stemming from lower prices for organic chemicals.

Year-on-Year Change

Most Non-oil sub-indices rose year-on-year in July 2026. The Machinery & Transport Equipment index was the largest contributor to the increase in the Non-oil index, rising 42.3% year-on-year and extending its upward trend, with the pace of increase strengthening in recent months. The increase was due to higher prices for electrical machinery apparatus such as electronic integrated circuits.

Technical Note

The **Singapore Manufactured Products Price Index (SMPPI)** monitors price changes of locally manufactured commodities. The weights of the index are derived from the distribution of local production by commodity in 2022. Ex-factory prices are obtained from principal manufacturers of the items concerned.

The **Domestic Supply Price Index (DSPI)** is designed to measure the changes in the price level of either goods manufactured locally or imported, which are retained for use in the domestic economy by the government, business or household sectors. For imported products, the prices refer to those paid by importers in bringing the goods into Singapore, commonly referred to as c.i.f. prices. In the case of Singapore manufactured products, the quotations used are ex-factory prices. The weight for each commodity item is proportional to the value of its total supply or availability in the domestic market in 2022.

The SMPPI has consistently recorded response rates of about 80% for each reference month, based on total production values of all selected commodities where price data could be collected from surveys and administrative sources for the month. The DSPI does not have a response rate given that it is a composite index of the SMPPI and the Import Price Index (IPI).

Index Formula

The 2023-based series is compiled using the 'modified Laspeyres' formula where the weight reference period of 2022 preceded the price reference period of 2023. The geometric mean formula has been adopted in the computation of unweighted elementary aggregate price indices. The arithmetic mean formula is applied in compiling indices at higher levels of aggregation where weights of specific sub-indices are available.

Measurement of Changes in Price Indices

Change over previous month compares the index of the month with that of the preceding month. Such comparisons measure the change in the price index between two consecutive months. They serve as useful short-term indicators of the price movements.

Change over same period of previous year measures change in the index over a twelve-month period. Such comparisons compare the movement in the price index between similar months in two consecutive years.

Linking the Old 2018-Based Price Index Series to the New 2023-Based Price Index Series

The SMPPI and DSPI have been rebased from base year 2018 to base year 2023. To facilitate comparison of the historical price indices across base years, the old 2018-based series are linked to the new 2023-based series by re-scaling them via a Linked Coefficient. The Linked Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2018-based index in 2023.

Example: Linking the old Iron & Steel Index series for SMPPI prior to 2023, to the 2023-based Iron & Steel Index (2023=100)

1) Calculate the linked coefficient

Year	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)	Linked Coefficient
2023	135.6	100.0	$100.0 \div 135.6 = 0.737$

2) Re-scaling the old series to the 2023-based series using the Linked Coefficient

Year	Month	Iron & Steel Index (2018=100)	Iron & Steel Index (2023=100)
2021	Dec	125.6	$125.6 \times 0.737 = 92.6$
2022	Jan	127.2	$127.2 \times 0.737 = 93.7$

Rescaling the 2023-Based Index Series to Previous Years

To continue the old 2018-based index series going forward in time, re-scale the new 2023-based index series to the old base year 2018 level, via a Rescaling Coefficient. The Rescaling Coefficient is the ratio of the annual 2023-based index in 2023 to the annual 2023-based index in 2018.

Example: Rescaling the new 2023-based Iron & Steel Index series for SMPPI to the 2018-based Iron & Steel Index (2018=100)

1) Calculate the rescaling coefficient

Year	Annual Iron & Steel Index in 2023	Annual Iron & Steel Index in 2018	Rescaling Coefficient
2023	100.0	73.7	$100.0 \div 73.7 = 1.357$

2) Re-scaling the new series to the 2018-based series using the Rescaling Coefficient

Year	Month	Iron & Steel Index (2023=100)	Iron & Steel Index (2018=100)
2024	Jan	100.0	$100.0 \times 1.357 = 135.7$
2024	Feb	100.6	$100.6 \times 1.357 = 136.5$

Index Revision

The indices may be revised when late returns and amendments received from respondents are incorporated.

Dissemination of Data

The Singapore Manufactured Products and Domestic Supply Price Indices are available on the SingStat Website (<https://tablebuilder.singstat.gov.sg/>)

For more information about the indices, please refer to the [Catalogue of Products](#) in Page 13.

SINGAPORE DEPARTMENT OF STATISTICS COMMUNICATIONS & INFORMATION SERVICES

The Singapore Department of Statistics (DOS) offers official statistics, data insights, visualisations, and statistical resources through user-friendly platforms.

SingStat Website

Visit this convenient gateway to access latest data and statistical information.

Data across the six major themes of Economy & Prices, Industry, Trade & Investment, Population, Households, and Society covering some 200 topics such as Gross Domestic Product, Consumer Price Index, Retail Sales and Food & Beverage Services Indices, Producer Price Indices, Business Expectations, Business Receipts Index, Trade in Services, Direct Investment, Population Indicators, Household Income, Household Expenditure, Deaths and Life Expectancy, Births and Fertility, Marriages and Divorces, and more.

Publications

- **Statistics Singapore Newsletter** - features articles on latest key statistical activities, recent survey findings, and methodological improvements.
- **Information Papers** - highlight conceptual and methodological changes and improvements in official statistics.
- **Occasional Papers** - present statistical trends and observations on important social and economic issues to stimulate discussion and research.
- **Singapore in Figures** - allows exploration of key economic and socio-demographic statistics through interactive dashboards.

Visualisations such as infographics and interactive dashboards with latest data, and videos to explain data and statistical concepts.

Businesses Insights Tool for Enterprises (BITE) serves businesses with bite-sized data for big decisions, giving firms insights on their customers, industries, and business performance.

Advance Release Calendar with dates of upcoming data and publication releases in the next twelve months.

SingStat Table Builder

Access some 2,400 data tables for free across various economic and socio-demographic domains from 70 public sector agencies. Watch the [video](#) to find out how you can easily access and customise data tables.

SANDRA (Statistics AND Data Retrieval A.I. Assistant)

Chat with SANDRA on your data enquiries. Watch the [video](#) to find out how SANDRA can assist you in finding the data you need.

SingStat Express

Subscribe to receive alerts on the latest press releases, occasional/ information papers, and newsletters.

SingStat Mobile App

Download the app for fast and convenient access to commonly used statistics from your mobile devices.

Over 300 charts are available across over 40 data categories for easy access to visualise data trends.

For statistical enquiries, you may reach us at:

✉ email: info@singstat.gov.sg or submit the [Data Request Form](#)

☎ phone: 1800-323 8118* (Local users) or (65) 6332 7738 (Overseas users)

* Calls from mobile telephone lines to 1800 local toll-free number may be subject to mobile airtime charges as imposed by the relevant mobile service provider.
